

Zero Trust Security Posture Managed Services from Noventiq

Cybersecurity is a process, not a project.
There is a way to manage it.

Zero Trust Security Posture Managed Services provides measurable cybersecurity posture metrics and continuous posture improvement process aligned to CISA Zero Trust maturity model.

Recommended for cybersecurity executives...

...who are looking for a meaningful way to measure and manage cybersecurity posture in their organization, outsourcing or augmenting internal capabilities and ensuring compliance to NIS2 and other relevant legal requirements.

Zero Trust Security Posture Managed Services enables organizations to outsource all or relevant parts of cybersecurity posture management.

Zero Trust Security Posture Managed Services

We enable enterprises to implement measurable, continuous cyber security posture improvement program and to outsource all or relevant parts of cybersecurity posture management.

- 1** **Vendor neutral**, aligned to CISA maturity model
- 2** Provides **clear metrics** to communicate cybersecurity posture to stakeholders
- 3** Risk-based **personalized** target posture profile for each organization
- 4** Encompasses **tools**, but also **processes** and **procedures**
- 5** Supports organizations in **planning**, but also **operations**

Cybersecurity is a process, not a project.

Zero Trust Security Posture Managed Services has 3 main phases – Assess, Align and Advance.

Phase 1 - Assess

Provides assessment of existing cybersecurity posture and boosts employee cybersecurity awareness.

What is included?

- Assessment of current state across all Zero Trust pillars
- Definition of personalized, risk-based target maturity state
- Actionable “lowest hanging fruit” improvements

Price: 5500 USD

Duration: approx. 1 month

Key deliverables:

- Executive summary, quantifying existing cyber posture state.
- Recommendations for Align phase – key improvements for immediate attention.
- Detailed description of each Zero Trust pillar and recommendations for each of more than 20 components

Phase 2 - Align

Implementation of key “lowest hanging fruit” improvements from Assess phase.

What is included?

- Implementation of key “lowest hanging fruit” improvements by Noventiq experts based on Assess phase findings
- Tools, processes, and procedures

Price: depending on Assess phase findings

Duration: approx. 1-3 months

Key deliverables:

Based on Assess findings, most often includes:

- improvements in cybersecurity policies,
- identity management (Active Directory, Azure MFA, Pointsharp MFA),
- business continuity, patching, updates and management (Intune, Azure Arc, Azure Update Management, Azure Site Recovery, Veeam Backup),
- XDR capabilities (Microsoft Defender, Sophos),
- SIEM/SOAR platforms (Azure Sentinel, Sophos MDR),
- network protections (Azure WAF, Sophos Zero Trust Network) etc.

Phase 3 - Advance

Provides assessment of existing cybersecurity posture and boosts employee cybersecurity awareness.

What is included?

- Continuous improvement implementation and cybersecurity process KPI measurement according to Assess and Align outcomes.
- Available as full managed service as internal team augmentation

Price: depending on scope

Duration: 1 year or longer

Key deliverables:

- 24/7 outsourced detection, containment, and resolution service
- Desktop management with Intune – patching, updating, policy enforcement
- Packaged Secure Score optimization
- Azure Active Directory / Microsoft 365 managed services
- Remote help with Intune
- End user cybersecurity awareness trainings (Intervy.app)
