# Leadership in AI
## Navigating AI Ethics & Accountability

## ABOUT Noventiq

Noventiq, a leading global IT powerhouse, empowers and accelerates digital transformation for 75,000+ organizations. Backed by 25+ years of Microsoft expertise and Azure excellence, we connect you with best-in-class cloud solutions, from AWS and Azure to our own managed services. Our 6,200-strong team across 60+ countries unlocks your potential through a comprehensive portfolio.

## WHAT WE OFFER

Our 'Leadership in AI' workshop, delivered online over one day, empowers company stakeholders and CxOs with a deep understanding of how the Microsoft AI technology stack addresses ethical considerations, regulatory frameworks, and accountability mechanisms crucial to AI infusion and deployment. Through a blend of theoretical insights and practical strategies, participants gain tools to navigate the complex landscape of AI ethics, bias, transparency, accountability, and liability.

Tailored for pivotal decision-makers overseeing strategic initiatives, this workshop enables attendees to implement ethical AI practices, ensure regulatory compliance, and effectively mitigate risks. Upon completion, participants emerge prepared to lead their organizations responsibly and ethically in the rapidly evolving AI landscape by leveraging the Microsoft AI technology stack.

### See what customers are saying:

Attending the 'Leadership in AI' workshop with Noventiq AI experts was an eye-opening experience. The comprehensive insights and practical strategies provided have empowered our organization's leadership to navigate the ethical complexities and regulatory demands of AI development with confidence.

# Leadership in AI

**Empowered by Microsoft AI, leaders drive ethical innovation**

## Module 1: Understanding AI Ethics & Regulatory Frameworks

Gain a comprehensive understanding of global AI ethics and regulatory frameworks, equipping you with the knowledge to effectively navigate ethical considerations and regulatory requirements in AI development and deployment.

## Module 2: AI Accountability and Compliance

Delve into the intricacies of AI accountability and compliance, exploring key regulations such as GDPR and the AI Act. Learn strategies to ensure compliance throughout the AI lifecycle and effectively mitigate risks.

## Module 3: Case Studies of using Microsoft Azure AI stack

Apply theory to practical scenarios with hands-on exercises and real-world case studies utilizing the Microsoft AI technology stack. Leverage Microsoft's expertise in AI governance to address challenges and drive informed decisions within your organization.
