Backup Lite – the low-cost, secure way to back up your data

Backup Lite provides SMB Customers with top-notch security protection by securing data across all devices and attach surfaces (workstations, servers, mobile devices).

Implementing traditional backup and recovery processes, with a built-in security layer, can take at least a few weeks and requires significant CAPEX/OPEX investment in equipment and technology support.

CHALLENGES

- Protracted timeline on backup and security projects
- High CAPEX/OPEX investment
- Security breaches (workstations / servers / mobiles)
- Lack of centralized backup and recovery resource (policies)
- Long restore times & unsecure recovery

IDEAL SOLUTION

- Fast and easy implementation
- The right size and qualified backup targets with minimized monthly backup costs
- Transparent cost structure for backups/recoveries
- Anti-ransomware protection
- Minimal restore times

DESIRED OUTCOMES

- Ongoing protection for files, data and workloads
- Advanced cyberthreat protection (ransomware)
- Fast implementation and 1-click onboarding
- minimal TCO with no upfront investment

Backup Lite Touch provides real-time file and data protection, with advanced cyberthreat protection, minimal TCO and no upfront investment for technology and services.

1 Convenient agentless backup
No need to install any software on customer devices. All the necessary software runs in secure cloud storage.

2 Quick granular restore
Recover your devices in seconds, avoid downtime, and ensure business continuity. Granularly backup and restore data as required such as emails, files, sites, contacts, attachments, etc.

3 Effortless backup with Cloud Deployment
Start backups and protection quickly with no upfront costs. Backup Lite lets you backup data and secure workloads right from your on-premises hardware and Microsoft Office 365.

BackupLite

Backup Lite Touch services

Noventiq Backup Lite gives you back control over your Microsoft 365 data. Manage overspend and keep your business running smoothly with this user-friendly, efficient, and secure cloud-to-cloud backup solution.

Exchange Online

Protect all your emails, attachments, contacts, tasks, group mailboxes, archive mailboxes, and calendars.

NOVENTIQ
Modernize your security stack with Backup Lite to integrate cloud-based email security with backup, recovery, endpoint protection, DLP, and cyber protection management.

Reduce the resources needed to deliver multiple services, and cut costs by consolidating your solutions.

Backup Lite will help you to compile all your reports:

- **Create and customize multiple reports** – add and remove columns, add sorting, grouping, and more

- **Add Widgets** – throw in some nice diagrams for reports that look and feel great

- **Schedule reports** to be sent by email or saved to folders in any file format.
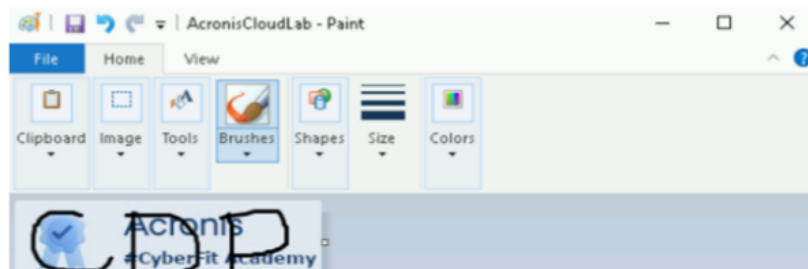

![BackupLite logo]

Advanced Backup Pack: Continuous Data Protection (CDP)

1. In the file manager on the lab machine, open the file in the C:\Logo folder.
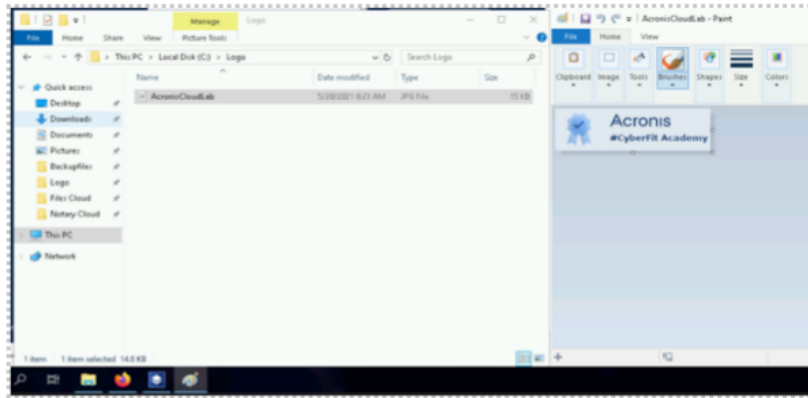

You backed up this file earlier with the rest of the machine.

2. Draw something in this logo and save it.

Even though the regular backup is as long away as 11:30PM tonight, *Continuous* Data Protection has *already* saved the new version of this file to the cloud, as you set up in your protection plan.

3. Go to the Recovery tab for the machine, select its **CDP** recovery point, and then click **Files/folders**.
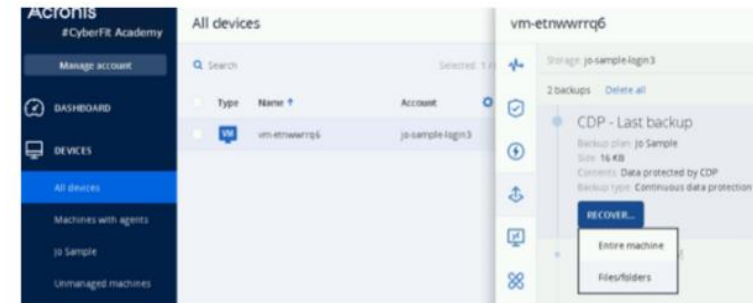

4. Observe that there are two recovery points (two versions) for your logo file already.
