We help SMB companies to protect all IT assets and workloads

ABOUT Noventiq:

Noventiq is a leading global solutions and services provider in digital transformation and cybersecurity, headquartered and listed in London. The company enables, facilitates and accelerates digital transformation for its customers' businesses, connecting 75,000+ organizations from all sectors with hundreds of best-in-class IT vendors, alongside its own services and solutions. Noventiq 3,900 employees work in almost 60+ countries throughout Asia, Latin America, Eastern Europe and Africa—markets with significant growth potential.

Digital Transformation Secure & Transform

Noventiq competencies in protecting, backing up and recovering data with workloads is world-class.

Backup Lite will help you to address highly important IT processes such are backup and recovery, with minimal efforts and across the complete organization with minimal IT resources engagement.
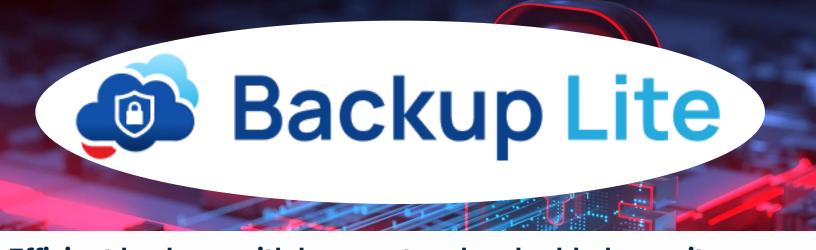

Backup Lite

Backup Lite is designed to provide to SMB companies top notch backup & recovery with security protection which secures the customer data across all devices and attach surfaces (workstation, servers, mobile devices).

In case that your company decides to implement traditional backup and recovery processes, with security layer within those processes, in the best-case scenario this project will last for several weeks and will imply significant CAPEX/OPEX investment in the necessary equipment and technology support.

Backup Lite will help you to address highly important IT processes such are backup and recovery, with minimal efforts and across the complete organization with minimal IT resources engagement.

Backup Lite will help you to increase the productivity of your Company and help to achieve 100% usage of protection of all relevant software and data in your Company.

Backup Lite

Efficient backups with low- cost and embedded security

- Optimize your IT team's workloads with easy and efficient backups

- Recover your devices in seconds, avoid downtime, ensure business continuity

- No upfront costs and easy to start backing up and getting protected

- Advanced cyberthreat protection (ransomware) in the same package

Self-service backup and recovery with security assessment

Lack of centralized backup and recovery resource (policies)
Lack of skilled resources, backup/recovery practices take a back seat to day-day operations and are handled on an ad hoc basis

Minimize the backup cost and improve security
The right size and qualified backup targets with minimized monthly backup costs. Secure data from potential ransomware attacks

Enable disaster recovery and backup with minimal restore time
Beyond simple backups, it's essential to enable DR to keep all your on-prem and cloud workloads running with minimal downtime

Protect all your on-prem and cloud IT assets, from workstations, servers, and O365 accounts, to mobile and storage devices
