SAM Lite

Knowledge & Technology adoption with Noventiq's Lite Touch service

SAM Lite

Microsoft
Solutions Partner

Transform and operate efficiently and securely in the digital economy

Noventiq's **SAM Lite** is a self-service assessment and asset management application that helps your company to discover, list and get the most out of the software and hardware you've purchased.

In just a few hours, **SAM Lite** can give you a complete repository of purchased on-premises software and hardware for your entire organization (on-prem & cloud) along with detailed data on deployment, license and usage (metering). It also shows you exactly how to optimize costs and minimize risks. It even gives you an actionable plan so you can align your IT environment with best practices.

CHALLENGES

The average IT manager has thousands of IT assets to manage, optimize, and protect. Managing IT assets is complicated because data is stored in disconnected silos. SAM Lite, gives you the insights you need to reduce waste, mitigate risk, improve security, and embrace the future – all from one platform.

IDEAL SOLUTION

SAM Lite is a self-service assessment and asset management application that helps SMBs to establish process across their IT environment (software + hardware). It solves these issues:

- No repository for centralized up-to-date IT assets
- Financial challenges due to a lack of data and skilled resources
- Technology adoption and improvements

DESIRED OUTCOMES

Build an informed business case for cloud migration. Define costs, risk and your overall readiness for migrating workloads to the cloud.

Reduce your server footprint and maximize your existing software licensing.

Gain visibility over the overall state of your cybersecurity.

SAM Lite

Noventiq SAM Lite Service

Noventiq SAM Lite touch service is on-demand application which goes beyond basic SAM practice (discover, collect, present) and brings much needed tailored-made instructions how to achieve IT cost optimization, minimize identified risks and offer viable plan to align your complete IT landscape with industry best practice.

1

Cloud Enablement Assessment

Obtaining granular visibility into existing workloads and licensing is essential in understanding the true costs of IT operations and cloud migration cost.

SAM Lite service carefully assess resource capacity, utilization, and licensing as well as workload dependencies and the detailed characteristics of your network.

2

Cybersecurity Assessment

Uncover any non-standard patch levels, unprotected endpoints, or currently exploitable, published vulnerabilities. Improve overall cybersecurity and asset management procedures.

Get practical recommendations based on internationally recognized CSC and NIST security frameworks.

3

Microsoft 365 benefits

The Secure Score report can provide insight into your security settings, and areas in which you might improve them.

The License Allocation view help you determine how many licenses you purchased vs. consumed.

The License Usage report will show you the usage data for all the users with active subscriptions.

SAM Lite

Noventiq SAM Lite Service
Asset Management for Modern IT

A centralized blueprint of your total IT infrastructure, including IT assets, real software consumption, cybersecurity threats, and cloud utilization metrics.

Automated deliverables with tailored insights and recommendations to act on these IT assets and security findings.

Microsoft 365 adoption

SAM Lite is integrated with Microsoft's Microsoft 365 and Azure Active Directory to pull in data such as your Microsoft Azure license entitlements, utilization, and service levels.

Microsoft 365 reports allow you to pull Microsoft 365 information associated with your organization from the cloud, allowing you to view your on-cloud and on-premises data in one interface.

Vulnerability Detection

Reporting on specific Windows vulnerabilities so that users can quickly determine their level of exposure to the latest threats. Some items include:

- WannaCry/BadRabbit
- Meltdown
- BlueKeep
- Windows CryptoAPI Spoofing

SAM Lite helps

-Quickly plot a path to seamless collaboration, remove deployment impediments and even enable your team to realize the value of your existing Microsoft investments.
Drive standardization, performance and eliminate risks associated with outdated technology.
Identify assets in need of replacement and the most cost-effective options.

Why SAM Lite?

SAMLite

1 Easy deployment

SAM Lite can be deployed as an application or virtual appliance. Configuration is simple and takes less than 30 minutes

2 Complete data collection

SAM Lite detects and captures each IP device with the relevant SAM data. It works with all types of server, desktops, routers/switches and more.

3 Secure data processing

SAM Lite will collect, analyze and process SAM relevant data, without storing any sensitive information.

4 Low impact discovery

Most discovery tools require an agent to be installed on endpoint devices – time consuming and unreliable. SAM Lite uses agentless technology!

5 AI scanning accuracy

SAM Lite utilizes AI and ML to process vast amount of assets data, continuously improving the accuracy and usability of SAM data.

6 Built for hybrid IT

SAM Lite technology is built by industry experts with decades of real-world IT experience. It’s also set up for on-prem and cloud resources. Exactly what your business needs.
