

Scan Lite

A single source of truth for all IT assets with high security and proactive change management

ABOUT Noventiq:

Noventiq is a leading global solutions and services provider in digital transformation and cybersecurity, headquartered and listed in London. The company enables, facilitates and accelerates digital transformation for businesses, connecting 75,000+ organizations from all sectors with hundreds of best-in-class IT vendors, alongside its own services and solutions. Noventiq's 3,900 employees work in almost 60+ countries throughout Asia, Latin America, Eastern Europe and Africa—markets with significant growth potential.

Digital Transformation.
Accelerated. Secured.

Noventiq's competencies in controlling and managing software and IT assets are world-class.

Our services reduce compliance risks and have a tangible effect on the overall cost of IT estate.

Scan Lite

Scan your IT network and get a comprehensive inventory in one dashboard

Scan Lite is a comprehensive self-service network discovery and inventory service that, in just few steps, can identify, inspect, and track all the computers, servers, printers, switches, routers, and other physical and virtual equipment in your network.

Available in the cloud or on-prem, Scan Lite uses state-of-the-art tech to offer scanning and auditing tools with best-in-class features, as well as usability, and scalability.

Each year, your company need to list all the software and hardware you've purchased and used. Scan Lite makes it easy to gain a comprehensive overview of your hardware and software inventory.

Scan Lite

How does Scan Lite Service work?

Noventiq's Scan Lite Service is a self-updating cloud-based solution which gives you a complete, searchable, and continuously updated inventory of all the IT assets in your organization, wherever they are.

Benefits

Scan Lite provides a clear picture of your IT ecosystem, so you and your team can:

- Make informed, fact-based IT decisions
- Prevent unnecessary expenditure and maximize the use of your IT budget
- Improve IT support capabilities and IT planning
- Detect potential issues and find optimization opportunities
- Reveal shadow IT and mitigate security risks

Key features

- Quick network scans for automated discovery and detection of all network devices
- Remote audit of Windows, Linux, and macOS computers, physical servers, and hypervisors
- Versatile agentless and agent-based audit methods
- Handy dashboard for quick access to key data
- Built-in tool for troubleshooting network connection issues
- A comprehensive picture of all installed software products for software license compliance

SOFTWARE AND HARDWARE ASSET MANAGEMENT FOR MODERN IT

A deep insight into your on-premise and hybrid cloud infrastructure.

Real-time based actionable strategies that accelerate cloud adoption, reduce risk, and save money.
