

Cybercrime becomes business. Hackers gather in criminal syndicates with sufficient funding. Cyber threats are in the center of attention of organisations and governments around the world, so financial and reputational risks become higher. Softline offers security solutions included in Microsoft 365.

Solutions deployment

Softline experts help to deploy security solutions included in Microsoft 365 products(Office 365, EMS, Windows 10). Deployment of these products allows protecting user accounts, endpoints, and documents and ensuring safe work with cloud applications. Automated attacks protection decrease response time and reduce reputational risks.

Technical support

Our qualified informational security specialists have broad expertise in collaboration with leading vendors. Usually our services are less expensive than work of in-house specialists. Moreover, we can help in complicated cases. We will come to you and deal with the problem, if needed, or transfer the inquiry to solution developer.

Penetration test

Our company carries out all types of pentests as a complex or individually depending on organizations needs. We run external pentest and web-applications testing, internal informational systems pentest, Wi-Fi access points pentest, socio-technical pentest and security audit. All kinds of work are accompanied by detailed reports and individual security improvement recommendations.

Information security awareness improvement

Educating helps to translate internal and external regulators requirements and form the understanding of how important compliance is. As a result, the risks of confidential data loss, financial theft and business reputation loss decreases. Our company specializes on elaboration of distance learning materials – online courses, browser games, videos, emails. We offer individual learning programs or the set of ready-to-use materials. In both cases, there is knowledge evaluation – cases, tests or exercises. Simple language, user-friendly design and humor elements makes educational process effective and comfortable for employees.

Softline has been a Microsoft partner since 1994 and received 22 Gold partner statuses since then. In 2019 Softline became the only Russian company with Azure Expert MSP certification and since 2020 we had Microsoft Security Gold status.

We scrutinize security services work as we get their importance for our customers. Softline gives necessary guaranties when transferring data to cloud, works according to SLA agreement and consults on questions concerning cybersecurity legislation.
