

SoftServe

ANALYTICS AS SERVICE

Scale your ability to help your business

OVERVIEW

We enable organizations to turn data into actionable insights without being limited by internal capacity. While many companies already have access to valuable data, they often lack the time or resources to fully leverage it. By extending your existing data team, this service provides the expertise and scalability needed to continuously deliver insights, Power BI dashboards, and data products, which helps you move faster and make more informed decisions.

WHY IT MATTERS

- Demand for analytics exceeds capacity, limiting timely insights delivery.
- Backlogs delay incoming requests and slow critical business decisions.
- Teams need timely answers to act and compete effectively today.
- Without the right model, analytics becomes a major operational bottleneck.

YOUR CAPABILITIES

- 

TURNING

analytics into a reliable, scalable ongoing capability system
- 

DELIVERING

insights faster and more consistently across teams
- 

REDUCING

backlog and improving overall responsiveness significantly today
- 

BUILDING

reusable, scalable, high-impact data products, not reports
- 

SHIFTING

from reactive requests to structured, continuous delivery

HOW WE WORK

- Business Understanding**

Clarify needs, define KPIs, and align with business goals
- Data Preparation**

Ingest, transform, and model data for analytics use
- Analysis & Insight Generation**

Deliver actionable insights and answer business questions
- Power BI Visualization & Reporting**

Build Power BI dashboards and reports for decision-making
- Data Product Development**

Create reusable, scalable, high-impact analytics assets
- Continuous Delivery**

Iterate, improve, and support evolving business needs

WHAT YOU CAN EXPECT

- 1

Continuous insights & Power BI reporting
- 2

Reduced backlog and faster response times
- 3

Consistent quality and standardized outputs
- 4

Reusable, scalable data products
- 5

Aligned business needs and data delivery

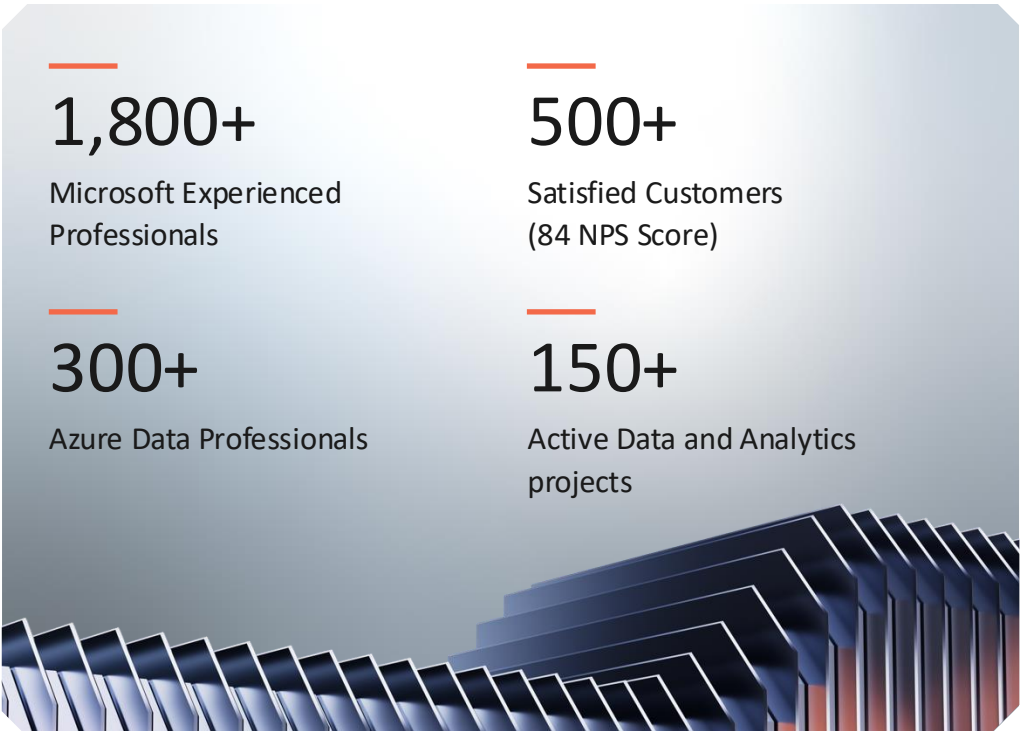

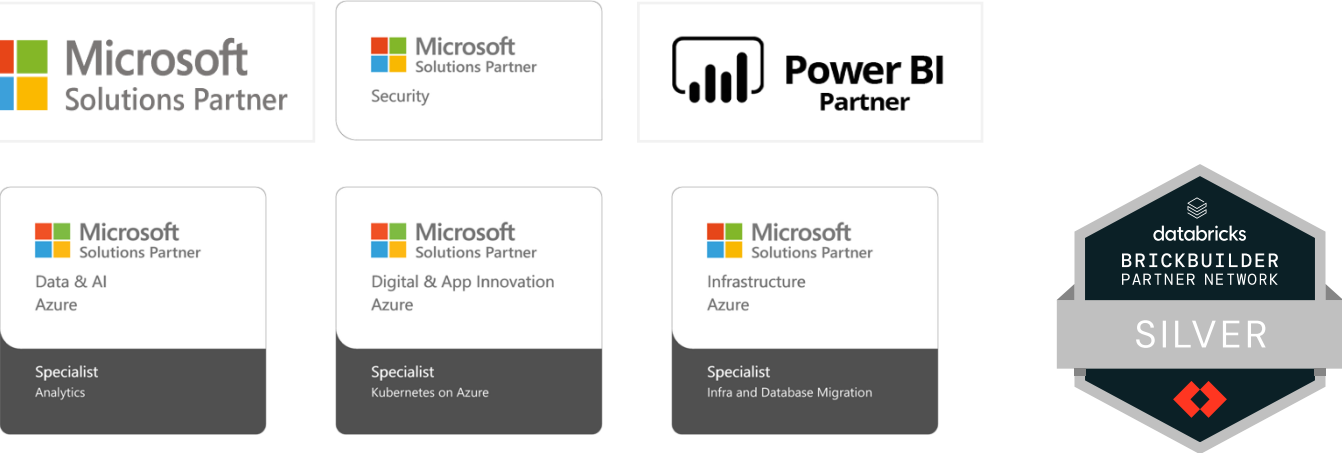

ENGAGEMENT OPTIONS

	\$25,000 per month SMALL TIER	\$50,000 per month MEDIUM TIER	\$80,000 per month LARGE TIER
Best for	You need better visibility into your numbers	You need data flowing across teams	You need analytics embedded in every decision
	- Dedicated Power BI expertise - Support for Power BI dashboards and reporting - Fast response to business requests	- Business analysis and requirement definition - Data engineering and transformation - Power BI dashboard and insight delivery - Delivery coordination and prioritization	- Advanced analytics and data product development - UX-driven Power BI dashboard design - Full delivery coordination and governance - Support across multiple teams and domains
Outcome	Consistent delivery of insights with minimal overhead	Structured, scalable analytics delivery across use cases	Mature, scalable analytics capability aligned with business needs

SOFTSERVE AZURE DATA & ANALYTICS EXPERTISE

SoftServe is a trusted Microsoft partner for organizations pursuing data and analytics transformation on Azure. With extensive experience in Power BI, Fabric, Azure analytics, and modern platform engineering, we build secure, scalable BI foundations that support enterprise decision-making.
