

5-DAY AZURE DEVOPS ASSESSMENT

Infrastructure
Azure

DEVELOP DEVOPS STRATEGY

WHY YOU NEED AN AZURE DEVOPS ASSESSMENT

- Get actionable recommendations to improve your current solution according to best practices and industry standards
- Understand how to integrate testing strategy into Azure DevOps
- Understand how to integrate Operations and project workflows

EASY STEPS TO MAKE AN ASSESSMENT SUCCESSFUL

- 1 Understand how to integrate Operations and project workflows
- 2 Introduce the Azure DevOps features and limitations
- 3 Review the existing Azure DevOps solution and overall DevOps processes, analyze efficiency and costs
- 4 Define the key areas for improvement according to industry best practices
- 5 Build high-level scope for implementation
- 6 Deliver the Architecture Assessment document, define the list of recommendations and a high-level roadmap for implementation

ABOUT THE ASSESSMENT

The Azure DevOps Assessment is designed to evaluate your Azure DevOps configuration against the latest set of DevOps best practices and industry standards. During the 5-day assessment, SoftServe's experts will explore the state of your overall DevOps processes. They will highlight the business needs, functional and non-functional requirements, and define the key DevOps metrics to be improved.

The information collected will be mapped with best practices, our own experience, and business needs to resolve the current DevOps challenges using Azure DevOps. The findings will be used to compile the list of bullet points for improvement and high-level scope to implement those changes.

IN 5 DAYS, YOU WILL GAIN

- Architecture Improvements and Proposal report with identified key findings and risks
- Actionable recommendations to build the robust DevOps strategy
- High-level implementation roadmap
