ABOUT THE REVIEW

The Azure Well-Architected Review is designed to evaluate your workloads against the latest set of Azure best practices and industry standards. Our experts will go through all five pillars of Azure Well-Architected Framework: Cost Optimization, Operational Excellence, Performance Efficiency, Reliability, Security; will make a trade-off analysis and provide you with a set of actionable recommendations that you can follow to better align the workload with your business priorities.

IN 2 DAYS, YOU WILL GAIN

- Architecture Improvements Proposal report with actionable recommendations
- High-level Implementation Roadmap to mitigate all key finding and risks
- Understanding of Well-Architecture Framework concepts
- Estimated budget for the next step

Cost Optimization	Operational Excellence	Performance Efficiency	Reliability	Security
