

DATA PLATFORM MIGRATION RESCUE

Get Your Microsoft Fabric Migration Back
On Track

OVERVIEW

Many Microsoft Fabric migration initiatives begin with clear intent but lose momentum due to complexity, unclear scope, or execution challenges. As timelines slip and costs rise, confidence in delivery declines. This service helps restore control by introducing structure, clarifying Fabric priorities, and defining a clear, actionable path to successful migration.

VALUE

Restore Delivery
Confidence

Stabilize
Execution

Reduce Cost Overruns

Accelerate Completion

WHY IT MATTERS

Fabric migration delays persist without recovery intervention.

Missed deadlines increase costs and strain resources.

Unclear scope leads to rework and inefficiency.

Poor coordination slows delivery and progress.

OUR CAPABILITIES

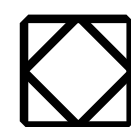

IDENTIFYING

the root causes of delays and cost overruns early

STABILIZING

scope, approach, and execution across teams

DEFINING

a clear, realistic path to successful project completion

WHAT WE COVER

Migration Scope & Drivers

- Clarifying Fabric migration scope, priorities, and success criteria for delivery
- Aligning migration goals with business and platform needs

Planning Artifacts Review

- Reviewing Fabric migration plans, assumptions, and documentation
- Identifying delivery gaps, inconsistencies, execution risks

Approach & Progress Review

- Assessing Fabric migration strategy, architecture, and delivery progress
- Identifying scalability risks, blockers, bottlenecks

Process & Delivery Audit

- Reviewing Fabric governance, workspaces, and ingestion pipelines
- Identifying operational gaps and delivery coordination issues

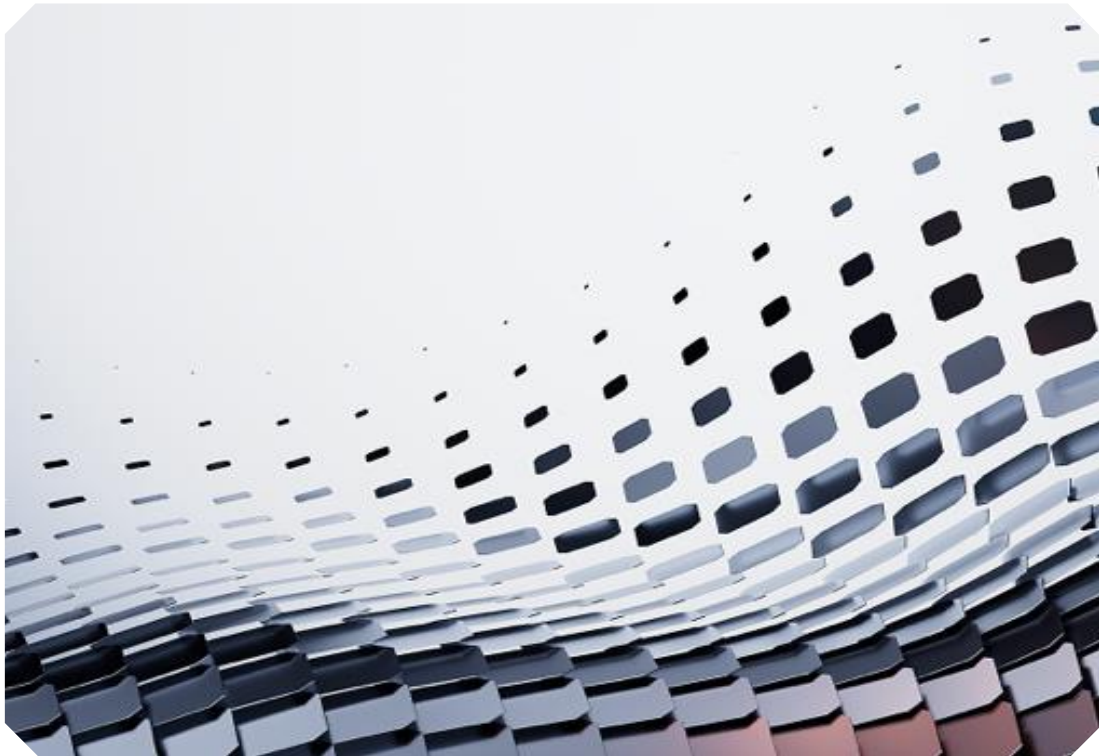

Rescue Roadmap Execution

- Defining a structured Fabric migration recovery roadmap
- Prioritizing stabilization actions and accelerated execution steps

WHAT YOU GET

- ✓ Root cause analysis of Fabric delivery delays and overruns
- ✓ Stabilized Fabric migration approach aligned with reality
- ✓ Clear recovery roadmap with prioritized execution actions
- ✓ Improved Fabric delivery structure and governance model
- ✓ Realistic timeline and execution planning approach

ENGAGEMENT OPTIONS

	4 weeks \$50,000 SMALL TIER Rapid assessment of a migration project	6 weeks \$80,000 MEDIUM TIER Comprehensive analysis and rescue plan	12 weeks \$200,000 LARGE TIER Complex enterprise migration rescue
1	High-level assessment of scope and project progress	Detailed review of Fabric migration approach and dependencies	Full-scope analysis & assessment across all key areas
2	Identification of key issues and critical risks and dependencies	Process and delivery assessment across teams and workflows	Deep dive into Fabric architecture and execution model
3	Initial recovery recommendations and next steps roadmap	Defined Fabric recovery roadmap and execution plan	Detailed recovery roadmap and delivery structure
Outcome	Clear understanding of what is going wrong and how to fix it	Validated recovery plan with actionable next steps	Comprehensive recovery plan ready for execution

SOFTSERVE AZURE DATA & ANALYTICS EXPERTISE

SoftServe is a trusted Microsoft partner for organizations pursuing data and AI-driven transformation on Azure. With extensive experience in Azure analytics, AI/ML, Fabric, and modern platform engineering, we build secure, scalable foundations that support enterprise growth.
