Microsoft

Why Should You Get A Rapid Assessment Now?

Total cost of ownership optimization is up to **30-55%** with cloud-native data warehouse services

Performance, scalability, elasticity – provide ample resources to be provisioned in a timely manner

Accelerate time-to-market with simplified path to onboarding new technologies

Leverage the power of cloud ML capabilities to enable data-driven decision making

WHAT WE'LL COVER IN THE WORKSHOP

- A bespoke introduction to Azure Synapse Analytics as an extensible unified data platform

- Migration scenarios overview

- Define key business drivers, priorities, scope, identify risks

- Conduct an initial assessment (existing data eco-system, data sources and data flows, data consumption scenarios, use cases)

- Trade-off analysis of migration scenarios, select solution candidate

ABOUT THE WORKSHOP

The balance between strategic planning and educational aspects will be defined prior to the workshop which depends solely on your organization's readiness to change.

The ultimate goal of the workshop is to trade-off different migration scenarios and select the best approach based on rapid assessment of your current state and business objectives.

We'll concentrate on the most critical areas to achieve this goal in the short term.

During the workshop we will:

- Discover the complexity of your existing system

- Identify migration scope

- Explain possible scenarios

- Select the best solution

- Define next steps

- Provide in-depth assessment and migration plan

- Present proof of technology or MVP options

IN 2 DAYS, YOU WILL GAIN:

- An assessment report – identified key drivers, constraints and risks

- A solution vision

- A high-level scope for the subsequent PoT/MVP or in-depth assessment and migration planning

- An understanding of the benefits of a migration to Synapse

- An estimated budget for the next step
