

ACCELERATE YOUR DECISION-MAKING PROCESS WITH SMART DATA

Get access to the right information at the right time to make informed decisions

In an increasingly digitized world, organizations are no longer relying on simple, manual spreadsheets to make informed business decisions. Instead, they are speeding up decision-making processes and business growth with reliable and smart data analysis. Unfortunately, this valiant data modernization effort can be squandered when investment into corporate data quality and gathering is overlooked. As a result, the ability to remedy business challenges and answer key questions is greatly reduced.

SoftwareONE's business intelligence (BI) services enable you to address business questions while minimizing technical challenges. Following a three-step approach, we provide you the tools and framework required to extract data and turn it into valuable information for your business. Our experienced team of data engineers will help you design a strategy and can support you through the implementation of your business intelligence strategy on Microsoft Azure or AWS.

SoftwareONE's Business Intelligence Delivery service extract valuable and reliable information out of your data to drive innovation and enhance business-making processes. Our experience in data integration, consolidation, and visualization helps you make fast business decisions that are educated and backed with reliable data. You can rely on SoftwareONE to help you learn more about your business and customers better than before.

In a world dominated by data, many organizations still find challenges with trying to utilize old and outdated information models. But integrating different data sources, consolidating the data, and creating data-based information visuals can cause major headaches. SoftwareONE can alleviate the pain with the expertise and knowledge of cutting-edge technologies, helping

you implement a solid business intelligence strategy for your company and saving you from the frustration of doing it by yourself. This way, your organization can combine data from multiple sources, analyze the information, and transform it into valuable insights that help with the decision-making process.

It's our mission to help you get the right data, to make the right decisions for the right people at the right time. Our various options are available to help set up and scale your Business Intelligence project and allow you to develop your own infrastructure that gives you full control over the implementation. You own the process and move at your own pace while we make sure that your individual business needs are met.

Our team of data engineers support you in executing the analysis, design, development, testing, and deployment of reliable information models and managing the Cloud platform required for the solutions to run. Depending on your business needs and existing or planned technology stack, we can implement your BI strategy in Microsoft Azure.

BUSINESS INTELLIGENCE DELIVERY

- › **Designing & Planning of Data Store**
- › **Implementing the Data Store and processing the Data**
- › **Reporting and presenting (Dashboards and KPIs)**

Change Enablement + Knowledge Transfer + User Adoption

A company-wide business intelligence system can be complex, time-consuming, and overwhelming to establish and plan alone. When it's implemented correctly with the help of an expert, however, your organization can reap significant benefits you simply can't with painstaking manual processes. SoftwareONE has various options available to set up and scale your business intelligence project so you can either build a proof-of-concept or develop your infrastructure, allowing you to have full control over the implementation process. Our experienced team helps you access the right information at the right time, allowing you to make better and informed business decisions.

Simple analytics are no longer enough: Business Intelligence (BI) is an excellent way to address business questions while minimizing technical challenges. In doing so, organizations can now combine data from multiple sources, analyze the information to get insights, better understand the bigger picture and make smart business decisions.

With SoftwareONE's business intelligence services, we will help you benefit from:

- › **Improved business efficiency**
- › **Improved decision-making process**
- › **Optimized data processes**
- › **Gain better access to meaningful and valuable information**
- › **Augmented capacity to product models and insights for the business**
