SoftwareOne Landing Zone for Azure

Your gateway to effortless cloud transformation and innovation

Considering a move to the cloud? SoftwareOne's Landing Zone for Azure is your secure, scalable, and cost-optimised foundation for cloud adoption. With ready-to-deploy environments built on best practices, you can confidently scale operations while maintaining governance and compliance.

Our service modules

Design

Collaborative workshops to create a high-level landing zone design aligned with Microsoft's guidelines.

Deployment

Prepare, configure and set up a solid deployment pipeline connected to your Azure environment, using Terraform.

Testing and enabling your team

Validate infrastructure functionality and empower your team with the information and tools needed to continue operations.

SoftwareOne's Landing Zone for Azure offers you

1. **Standardisation and utilising best practices:** Ensures best practices and standardised configurations, maintaining consistency and reducing misconfigurations.

2. **Security and compliance:** Provides a secure foundation with built-in security measures and governance structures, meeting compliance requirements and protecting data.

3. **Scalability and flexibility:** Features a modular and scalable architecture, allowing easy expansion and adaptation to your changing business needs.

4. **Cost efficiency:** Follows a structured approach for efficient resource allocation and management, leveraging Azure's cost management tools and best practices.

5. **Launch pad for innovation:** Enables you to stay ahead in the digital landscape and accelerate your organisations' AI, machine learning, and analytics opportunities.
