SHIFT SAP CRITICAL WORKLOADS TO AZURE

Safeguard Your Existing SAP Investments On Azure

Organizations using traditional data centers are struggling to keep up with increasing workloads and the associated costs. Fortunately, the Microsoft Azure infrastructure can efficiently handle both large and small volumes of data traffic and provide consumption flexibility that fits your specific requirements and can be ramped up and ramped down. Did you know that 68 % of cloud services today are delivered by Hyperscalers such as Microsoft already? That means organizations are no longer turning to the traditional data center, but rather towards the cloud.

SoftwareONE's SAP service accompanies customers on their journey to SAP on Azure. With our (SAP and Azure) certified, highly experienced SAP Consultants and an automated SAP workload migration service, SoftwareONE reduces complexity and risk leading to consistent and successful customer outcomes. With the futureproof Azure cloud platform, you can safeguard your existing SAP investments, leverage cloud economics, and increase IT agility and innovation.

Our international team of experts is focused on bringing the exceptional value of Azure to all SAP customers. SoftwareONE specializes in advisory, delivery, and state-of-the-art SAP platform managed services so we can bring tangible business value to our clients.

Our team of experts supports customers with varying requirements and 'appetites' regarding their desire to lift and shift their SAP applications to Azure:

› **SAP on Azure Advisory Services:** We accelerate the creation of roadmaps to migrate SAP to Azure.

› **SAP on Azure Proof of Concept Services:** We help migrate a non-productive ERP SAP system to Azure to prove viability and effectiveness of the new cloud environment.

› **SAP on Azure Migration Services:** We migrate entire SAP landscapes from on-premise hosting environments to Azure in a secure and reliable fashion based on our 8 year long experience in this specialized field.

In recent times, 95 % of leading organizations across all industries have adopted sophisticated cloud services and started moving away from traditional data centers, allowing them to reap significantly more business and IT benefits, directly impacting the bottom line. However, the path to gain those benefits from cutting-edge Azure technology isn't always clear.

Due to our almost decade long experience with Azure and SAP Technologies, SoftwareONE delivers:

- Best-in-Class architecture design for SAP on Azure
- Early identification of possible conflicts with database and platform changes
- Workload migrations of SAP Landscape to Azure
- Optimized SAP workloads on Azure driving performance, reliance, and sustainability
- Automation in the areas of migration, preparation, and deployment of SAP systems on Azure
- Dedicated high-value solutions and focused services to significantly reduce implementation cost & risk, and provide ongoing support

SoftwareONE provides a seamless transition to Azure.
With our support, you will soon be able to benefit from:

Reduced infrastructure costs through Azure adoption and cloud economics.

Gained scalability and flexibility based on changing consumption requirements.

Enhanced recovery point objectives (RPOs) and recovery time objectives (RTOs).

Avoidance of overprovisioning of physical on-premise hardware by leveraging Azure infrastructure driving cost reductions.

With SoftwareONE's expertise and ongoing support, you can seamlessly migrate your SAP workloads to Azure. In doing so, you will access and leverage cloud economics, as well as take advantage of IT agility and the possibility of accelerated innovation.
