

AI Prompter delivers intelligent searches and suggestions for:

- Customers – to obtain information about the company's offerings or customer service based on publicly available documents (e.g. company's website)
- Employees – to prepare answer quickly and accurately, based on aggregated internal documentation

How It Works – Business Concept (MVP)

Key Business Benefits

- **Enhanced Productivity:** AI Prompter significantly accelerates the handling of customer inquiries and back-office operations; it efficiently searches and synthesizes data from various sources, surpassing the speed of traditional human operators
- **Cost Efficiency:** Automates repetitive tasks to cut operational costs in customer support and company processes
- **Constant Availability:** Operates 24/7, providing round-the-clock service for customers
- **Scalability:** Handles high volumes of inquiries even during peak times, ensuring consistent service without delays
- **Improved Customer Experience:** Delivers rapid responses, reducing the need for call center contacts and customer efforts
- **Enhanced Employee Experience:** Reduces workloads for staff, allowing them to focus on complex tasks, boosting productivity and satisfaction

Key Features of AI Prompter

AI Prompter Commercialization

Scope of the MVP Version:

- Front-end application
- Documents management
- Prompting functionality
- Prompting parametrization
- Configuration and deployment
- Adjustment to customer specific documents
