

# Integration Strategy workshop

**Do you feel:**

*...that you need help for a system integration strategy that works for you?*

*...that you struggle with different kinds of integrations without a clear vision?*

*...that you need a document that shows your current and desired state of integration?*

## We offer

### Strategy workshop

We at Solidify want to help you find a way to an effective and sustainable strategy for system integration. We know that it can be challenging to manage different types of integrations, especially if you do not have a clear picture of your current situation and your future needs. That is why we offer you the following services:

We will assist you with our strategic framework, which contains our methodology, toolbox and accumulated experiences from many successful integrations.

- We guide you through a structured and proven process, where we analyse your integration landscape area by area and identify your strengths, weaknesses, opportunities and threats.
- We give you access to our teams, which consist of experts in both system integration and integration management, and who give you a comprehensive view of your integration maturity and potential. As a result of our collaboration, you will get:
- A documentation that describes your current state, maturity level, an analysis of your future needs and desired state.
- A proposal for an action plan that enables you to reach the desired state through governance, implementation, organization and management.
- A better control over your integrations and your integration future, as well as a greater confidence and competitiveness in your business.
