# Detect secrets and GDPR data leaks with Secret Scanner

## ABOUT Secret and Privacy Scanner

Secret Scanner is a tool that will help you and your company keep your repositories and tickets clean from confidential and sensitive data that might cause security issues and leaks or violate GDPR laws.

## WHAT WE OFFER

Secret scanner scans every commit as soon as the commit has made its way to Azure DevOps or GitHub. Potential secrets are then compared against an Exemption list. If a potential secret is not in the exemption list the scanner will alert both the developer and the Security Officer.

Secret scanner's highly configurable workflow enables for swift mitigation of potential security issues, securing your internal and production environments with little effort.

### Features

• Configure once per Azure DevOps project / GitHub Org.
• Supports both on prem and cloud Azure DevOps and GitHub installations.
• Continuous scanning of commits based on rulesets that fits your organization.
• Filter system for whitelisting of matches.
• Extendable filter system that enables secret validation against password managers.
• Configurable alert system.
• Web UI for manual whitelisting of secrets
• Everything packaged in containers for simple deployment.

# Why Microsoft Azure?

## Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

## Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

## Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

## Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

**Microsoft Azure**

**Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.**
