Power DBI

Troubleshoot your SQL Server
Instances with Power DBI

Are you struggling to **find the source** of your SQL Server issues?

Would you like to convert current manual checks to **automated processes?**

What if issues or **potential risk situations** could be seen at-a-glance?

Do you want to identify what is preventing your **environment from being healthy?**

Would you like to see and **control your SQL Server instances remotely?** During meeting, from your home, or from a client's site?

Then we have the right solution for you, **it is called Power DBI.**

What is Power DBI?

Power DBI is subscription-based services that make it easy to assess and troubleshoot SQL Server instances.

Benefit from a clear overview of your SQL Server's status from anywhere. We have mixed Microsoft Power BI's flexibility with the deep experience of our DBAs to help you assess and troubleshoot your data platform. Check all instances by yourself and quickly deal with any unwanted incident, almost in real-time!

- ⊘ Assess and troubleshoot any incident affecting your servers
- ⊘ Conduct periodical checks by yourself when needed
- ⊘ Find the root cause of any incident swiftly
- ⊘ Fix the configuration of your SQL Server environment
- ⊘ Timely detect missing backups and failed jobs
- ⊘ Receive high-end support to resolve complex incidents
- ⊘ Track performance from your mobile
- ⊘ Create operational dashboards

Buffer Pool

How can I access my data?

1 Download Power BI on the device of your preference (mobile phone or tablet) or Connect to powerbi.com with your credentials on your PC.

2 You will have access to a dedicated APP of Power BI Online Services with only your databases telemetry in a secure and isolated environment.

What is included in the Power DBI subscription?

- ✓ **Daily scheduled updates** to always analyze fresh pictures of your data!
- ✓ **Self-service interaction** to your SQL Server instances & technical data.
- ✓ **24-7 access** to an easy, intuitive, and centralized solution.
- ✓ A **quick overview** of the status of all of your instances.
- ✓ Monitor your SQL Server situation through your **mobile devices**.
- ✓ **Future enhancement** and features will be available for **free - in real time!**
- ✓ **Ask our experts for support** at a reduced price

Check problems by yourself

You can assess configuration and performance of your instances by yourself.

Centralize important information in just few dashboards

Thanks to a collection of reports in Power BI Online Services, you can have a clear and quick overview (just with one click).

Save time and monitor from anywhere!

You can monitor your SQL Server status also through your mobile phone during a meeting, home or your shopping time. No more time wasted checking every single server to find where the issue is!

Do you want to be your own DBA and get an easy overview of your databases?

The monthly subscription costs 100€/instance.
