

Power Platform Governance Fundamentals

Taking Power Platform in control

In this fundamentals assessment we will investigate current & wanted use of Microsoft Power Platform and provide simple and concrete steps to enhance control and security of the platform.

This assessment is targeted to situations where use of Power Platform is currently not controlled and steps towards control is wanted. This package will not replace a need of a governance plan but prevents platform getting in worse condition.

Work contents:

1. Install & review Power Platform Center of Excellence Starter-Kit (CoE)
2. Assess current usage and patterns
3. Concrete steps to enhance control of the Microsoft Power Platform
 - For example: DLP controls, Environment creation controls, sharing controls, CoE features
