

Technological Adoption Services

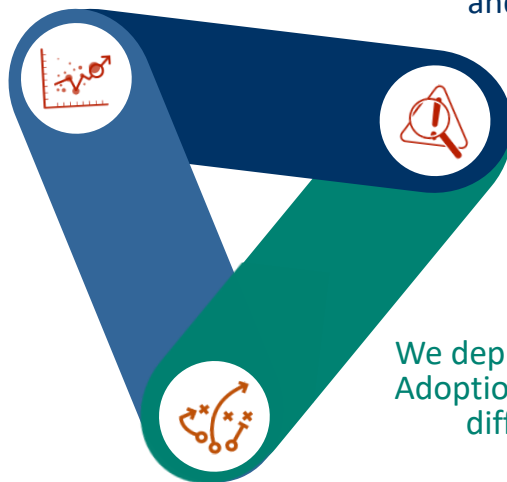

With **Technological Adoption**, we guide your company towards digital transformation by enhancing collaborative work, making the most of Microsoft 365 solutions.

Gold
Microsoft Partner

OUR METHODOLOGY

We measure the current state and the level of resistance to the use of technology.

We identify bad habits and show the benefit over the use of the tool.

We deploy the Technology Adoption strategy through different efforts:

Communication Campaigns: we inform and create awareness of the solutions.

Training Sessions: so that users know the use and benefits of the tools.

Leadership Network: we enable a network of people who support and encourage a new way of working.

OUR OFFER

Our services are based on the best practices of **Change Management**, offering appropriate solutions to the current environment, with the aim of making you and your employees quickly take advantage of the benefits of **productivity, communication and teamwork**.
