Threat Defense Workshop with SIEM Plus XDR

www.overcastmx.com

Learn how to put Microsoft's next-generation security tools to work for you.

Workshop highlights

- **Review** your safety goals and objectives
- **Identify** real threats in your cloud environment with Threat Check
- **Assigning** identified threats to specific solution recommendations
- **Showcase** safety scenarios with product demonstrations
- **Develop** joint plans and next steps

Do you know how many phishing attacks your organization has received? Are employees using the correct password protocol? Is personal data being exposed? In short, is your organization's cloud environment as secure as you think it is?

Improve your security posture with a threat defense workshop with SIEM Plus XDR

Organizations today are managing an increasing volume of data and alerts while dealing with tight budgets and vulnerable legacy systems. Get help achieving your broader security objectives, and identify current and real threats, by scheduling a threat defense workshop with SIEM Plus XDR.

We can help you develop a strategic plan customized for your organization and based on recommendations from Microsoft security experts. You'll gain visibility into immediate threats in email, identity and data, plus clarity and support on how to update your security posture for the long term.

Why should attend?

Given the volume and complexity of identities, data, applications, devices and infrastructure, it is essential to know how secure your organization is now and how to mitigate and protect against threats in the future. By attending this workshop, you will be able to:

Identify current security threats and vulnerabilities in your cloud environment	You will define the following practical steps based on your specific needs and objectives	Document your security priorities and needs for the benefit of key stakeholders	Gain a better understanding of how to accelerate your security journey with the latest tools

What to expect:

During this workshop, we will partner with you to strengthen your organization's approach to cybersecurity. We will help you better understand how to prioritize and mitigate potential attacks, with:
