

Microsoft 365 Defender Cloud Apps

Integrated threat protection with SIEM and XDR

Modernize how to protect your applications and data, and how to improve application health with Software-as-a-Service (SaaS) security.

Evaluation of the Operating System version and device management.

Addition of Microsoft Defender for Endpoint P1 and P2 customers (including those with Windows 365 Cloud PC).

Recommended settings for Microsoft traffic to travel through proxy servers and firewalls that restrict network traffic for devices that cannot connect directly to the Internet.

Enabling the Microsoft Defender for Endpoint service by explaining how to deploy a Microsoft Defender for Endpoint detection and response (EDR) agent profile using one of the supported management methods.

Implementation, configuration and training on Microsoft Defender for Cloud Apps Security.

Integration of Microsoft Defender for Office 365, Microsoft Defender for Identity and Microsoft Defender for Cloud Apps with Microsoft Defender for Endpoint.
