

Insider Risk Manager

Identify, investigate, and take swift action on internal risks intelligently.

Insider Risk Management enables customers to create policies to manage security and compliance.

Designed to help organizations identify and manage insider risks, such as IP theft, data leakage and security violations, based on policies built by customers to meet their needs.

By enabling insider risk management analytics, you can receive real-time guidance for indicator threshold settings. This helps you scan for potential insider risks before creating policies.

Create internal risk policy and conduct an evaluation of current potential insider risks in your organization

Access to reports and alerts

Create cases of the results generated by the policy

Enable and configure tests
