# Secure Multi-Cloud **Environments Workshop**

## Get a customized threat and vulnerability scan of your hybrid and multi-cloud environment and learn how to build a more robust cloud security system

#### Workshop highlights

Discover threats and vulnerabilities in your hybrid environment.

Learn how to prioritize and mitigate potential threats to your servers and services.

Understand what can be done to reduce the attack surface for hybrid workloads.

Learn about the benefits and capabilities of Azure Defender and Azure Network Security.

Develop the following steps defined according to your needs and objectives

Do you have a good understanding of the security vulnerabilities in your hybrid and multi-cloud environment, including virtual machines, databases, Azure storage and more? Do you know the amount of suspicious authentication activity in your multi-cloud environment? In short, are you confident in your organization's cloud security posture?

### Improve your cloud security posture with a **Microsoft Hybrid Cloud Security Workshop**

As the use of cloud services continues to grow, cyber risks and threats continue to evolve. Get help achieving your hybrid and multi-cloud security goals, and identify current and real threats, by scheduling a Microsoft Hybrid Security Workshop.

We can help you develop a strategic plan customized for your organization and based on recommendations from Microsoft cybersecurity experts. You'll gain visibility into immediate threats and vulnerabilities across Azure, on-premises and multi-cloud environments, plus clarity and support on how to improve your long-term security posture.

## Why you should attend

Given the volume and complexity of identities, data, applications, endpoints and infrastructure, it is essential to know how secure your organization is now and how to mitigate and protect against threats in the future. By attending this workshop, you will be able to:

Identify current security threats and vulnerabilities in your hybrid and multicloud environment.

You will define the following practical steps based on your specific needs and objectives

Document your security priorities and needs for the benefit of key stakeholders

Gain a better understanding of how to accelerate your security journey with the latest tools

## What to expect:

During this workshop, we will partner with you to strengthen your organization's approach to hybrid cloud security. We will help you better understand how to prioritize and mitigate potential attacks:

# Secure Multi-Cloud **Environments Workshop**

- Analyze your requirements and priorities for a hybrid cloud security detection and response solution.
- Define Scope & deploy Microsoft Defender for Cloud in the production environment, onboarding servers and other selected services.
- Explore Azure Network Security capabilities and experience selected Azure Network Security products in a demonstration environment.
- Discover existing hybrid workload vulnerabilities and learn how to reduce the attack surface area.
- Discover threats to the included hybrid workloads and demonstrate how to investigate and respond to threats.
- Recommend next steps on proceeding with a production deployment of Microsoft Defender for Cloud and Azure Network Security.

### Who should attend

The workshop is aimed at security decision-makers such as:

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- Data Protection Officer (DPO)

- Data Management Officer
- IT security, IT compliance and/or IT operations
- Data Governance

# Why Overcast?

When it comes to compliance, you need an experienced partner.
