Adoption & Change

Duration: 12 Weeks

Copilot Flight Attendance (ACM)

Introducing Microsoft 365 Copilot in your organization also requires some kind of adoption and change management actions to be taken. As a partner, we can help you introduce Copilot to your organization and drive end user adoption with our proven methodology and best practices.

Contents of the Workshop

- Our offering includes a communication strategy that delivers consistent and timely messages to your stakeholders, using various channels and formats.
- Moreover, we build a training and support plan together that builds the knowledge and skills of your users, using a mix of online and offline resources, such as webinars, videos, guides, FAQs, and more.
- Additionally, we support your organization within the various phases of change while planning, introducing and maintaining your Copilot platform within your organization to make sure, your end users gain the most out of Microsoft 365 Copilot by unleashing their personal creativity, unlocking productivity and upleveling skills.
