

PHARMACOGENOMICS

First Time in India - Personalized Health Care

- Want to know which medicine suits you best?
- Are you taking too many prescription medications?
- Do you know the probable side effects of the medicines you take?
- Do you know what dosage of medications is right for you?

**GenepowerRx
Pharmacogenomics is
here to address these
queries**

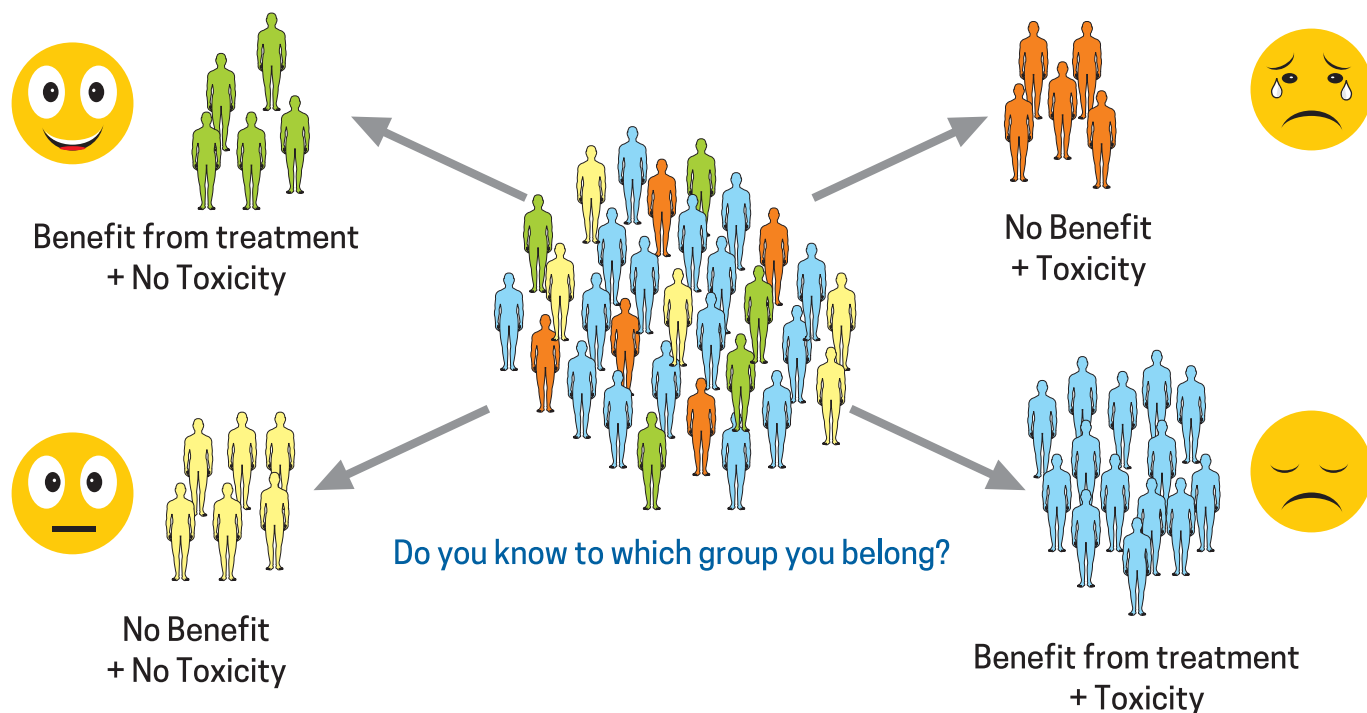

Prevent adverse drug reactions and drug toxicity by knowing the right drug which suits your body.

Right drug at the right time can save life!!!

Revolutionizing Healthcare delivery through Advanced Genomic Analysis

GenepowerRx Pharmacogenomics test that is intended to inform the clinicians and their patients to personalize a drug therapy, tailor-made according to the individual genetic makeup. The test covers hundreds of medications used to treat a wide range of medical conditions. The physicians empowered with a Pharmacogenomic report will prescribe the best treatment regimen to their patients, resulting in improved health outcomes with least or no side effects.

How does Pharmacogenomics testing help?

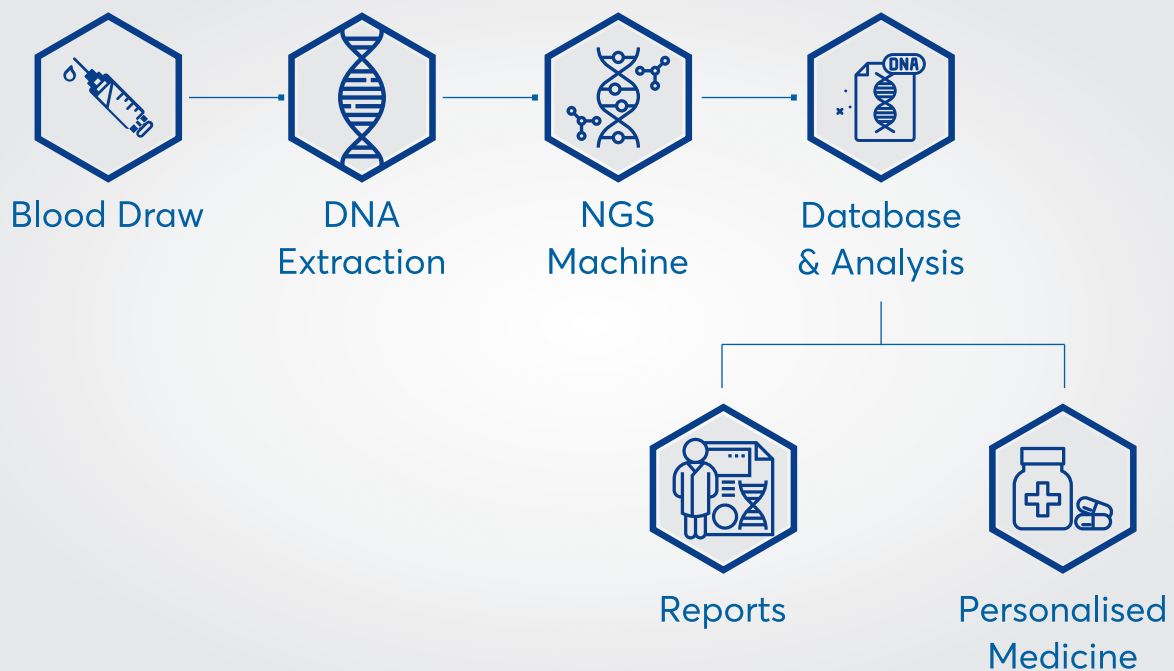

We use Clinical Genomic Testing based on "next-generation" sequencing (NGS) that allows to:

- Identify right medication
- Identify appropriate dose of a medication that suits an individual
- Reduce the risk of serious side effects
- Predict response to medication – Good/Poor/Intermediate

This helps the physician to personalize a therapy precisely based on Your DNA.

*** The whole report is backed by strong up to date scientific evidence ***

How it works

We Make Personalized Medicine a Reality!

Meet the doctors

Dr. Kalyan Uppaluri is the cofounder and the owner of K&H Personalized Medicine Clinic and Research Institute. He did his medical training at the prestigious Gandhi Medical College. He then moved to the United States, where he specialized in Internal Medicine at the McLaren Hospital, Michigan. He also got a degree in Medical Genomics from Ivy league institute, **Stanford University** and pursued cancer research at Wayne State University, Michigan.

Dr. Hima Challa graduated from Gandhi Medical College and was among the top few in her batch. She specialized in Internal Medicine at St. Joseph Mercy Oakland, Michigan in the United States. She graduated in Medical Genomics from the Ivy league institution of **Harvard Medical School**. She also holds a master's in nutrition science from the Texas Women University and in integrative medicine from the Arizona University.
