

Introducing Sonata Azure Services

Transform with Speed

Envision. Engineer. Evolve.

Dear XYZ,

Introducing Sonata's Innovative Azure Services. A cloud-centric approach determines the foundation for the digital journey. Businesses often face challenges while migrating to the cloud, where there is uncertainty in the areas of vision, scalability, security, and governance. Sonata has an unparalleled track record of deploying cloud platforms for renowned global clients, driven by a strong partnership with Microsoft for more than 30 years.

Sonata helps in harnessing the true potential of the Azure cloud with Assessment, Migration, Modernization, and Managed Services. Sonata helps its clients by creating a clear roadmap and a flexible, future-ready digital infrastructure, optimize operations and enhancing customer experience using our tool sets, IPs, and solution accelerators. Sonata's unique Platformation™ approach ensures well-defined roadmaps, expansive ecosystems, optimized execution, and seamless customer engagement.

Sonata's innovative Azure Services suite helps customers in a seamless cloud journey:

- **Azure Application Development Services:** Realize modernized apps or cloud-native platforms to maximize business flexibility with SonataBuild
- **Azure Data Services:** Create hyper-scalable modern Data Platforms & Intelligent Apps for various insights & Analytics processes
- **Azure Infra Services:** Transition from human-intensive infra services to automation-intensive NextGen cloud infrastructure management services
- **Digital Consulting Services:** Conceptualize, architect, and realize your cloud vision for your business needs with a prioritized roadmap and realized it through Sonata LightningAssess
- **Azure Devops Services:** Modernize your software engineering pipeline to achieve faster time to market, increased efficiency, security, and reduced cost using Sonata LightningOps
- **Digital Assurance Services:** Digital quality assurance for world class customer experience, seamless migration, and secure resilient digital process
