FORRESTER

Our cyber entity

Protect content and data

Beliefs & principles

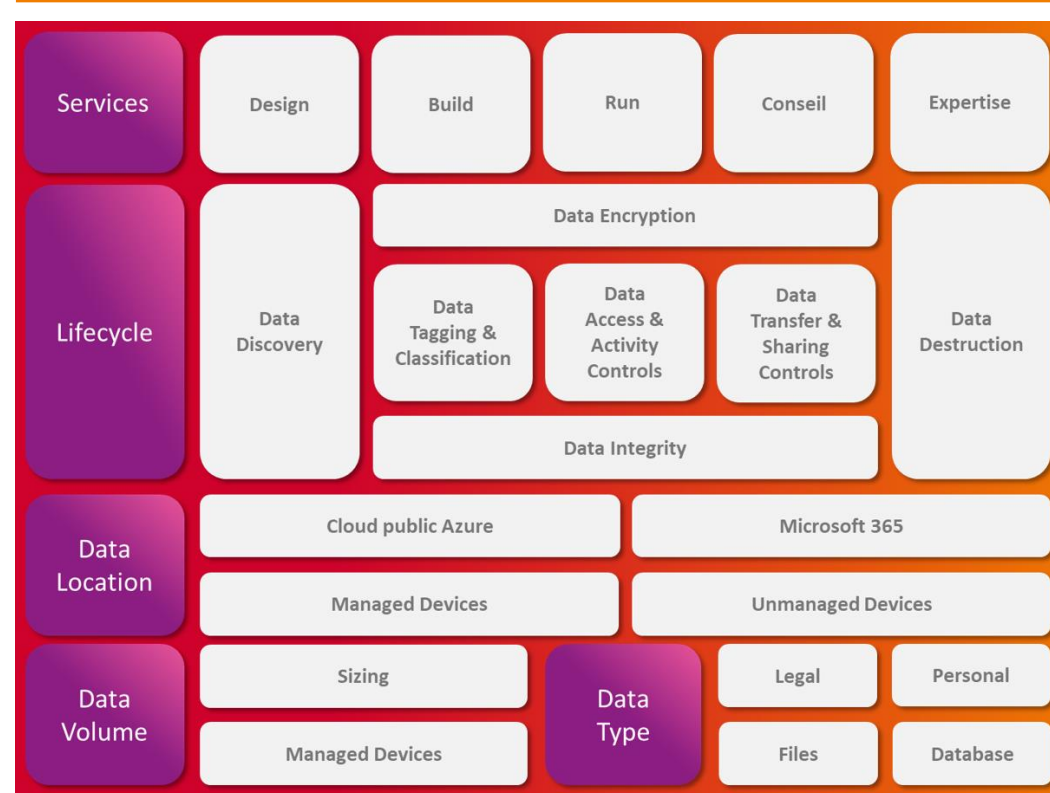

Reduction of risks related to an attack surface and impacts, thanks to a multi-layer protection around the data with:

- Discovery
- Classification / Tagging
- Access and transfer
- Export Control
- Compliance
- Encryption
- Integrity

Ability to respond to data breaches through interaction with Detect Investigation & Response teams that can be activated following a disaster.

Application of our services throughout the data lifecycle according to its location, the legislation applied, the volume and its type.
