

Discover Azure OpenAI Service Potential - 2 weeks

Sopra Steria Norway

Overview:

Unlock the transformative capabilities of the Azure OpenAI Service. Get actionable advice on how you can create business value by connecting your company data with state-of-the-art AI. Gain an understanding of how AI can be used to improve your business outcomes, while paying attention to privacy and confidentiality.

Key areas of focus include Azure OpenAI, ML, AI, Automation, and Advanced Analytics.

Target Audience:

- CxO Level
- CIO
- IT Managers
- Innovation Leaders

Professional Service:

Comprehensive assessment of the organization's current AI and ML landscape. Evaluate the potential of integrating solutions with the Azure OpenAI Service. Understand the organization's readiness to leverage the capabilities of the Azure OpenAI Service.

Solution:

A detailed assessment followed by a report highlighting:

- Potential use cases for integrating with the Azure OpenAI Service.
- Recommendations for pilot projects to validate the potential and ROI of the identified use cases.
- Insights into how the Azure OpenAI Service can revolutionize specific business processes.

Outcome:

A report containing:

1. Detailed description of the 2-3 most promising use cases where the Azure OpenAI Service can bring transformative benefits to the business.
2. Evaluation of the cost, complexity, benefits and recommendations for initiating pilot projects to validate the identified use cases.
3. A comprehensive business case outline, roadmap and investment recommendations for the pilot projects.
4. A recommendation of the optimal Azure services and configurations to best support integrations with the Azure OpenAI Service.

5. Strategic insights on how to seamlessly integrate solutions with the Azure OpenAI Service into the organization's existing tech stack.
6. Guidance on aligning the Azure OpenAI Service strategy with current landscape for compliance, including GDPR and EU AI Act.

INTERNAL:

Resources:

- 1-2 FTE – 2-3 weeks
 - Transformation Advisory / BC
 - Technical resource Business Analytics – AI.
