Microsoft Fabric Proof of Concept

Power business decisions with cloud-scale analytics

Microsoft Fabric PoC

Sopra Steria Fabric PoC – 2 weeks engagement*

Unlock the business value you expect and achieve more with less by unifying your hybrid and multi-cloud data estates for faster, connected intelligence. We dedicate this PoC to open up your enterprise data estate for advanced analytics in your organization.

Microsoft Fabric is an all-in-one analytics solution for enterprises that covers everything from data movement to data science, Real-Time Analytics, and business intelligence

The purpose of a Microsoft Fabric Proof of Concept is to help customers evaluate the possibilities and benefits that this integrated data and analytics platform can offer through delivery of first use case.

From data integration and engineering to business intelligence and real time analytics, Microsoft Fabric enables data professionals to host all their analytics workloads in a SaaS-based, lake-first solution, eliminating organizational siloes.

The Sopra Steria's Microsoft Fabric Proof of Concept will help customers align current organizational data sources to Microsoft Fabric solutions that prioritizes data storage, data sharing and analytical efficiency

Microsoft Fabric

Pre-requisites

To start a PoC we need to determine the access to source data [Table or files], Location of existing data and with file access. Also, some licensing is required like Microsoft Power BI Pro license and a Microsoft Azure account / Azure ActiveDirectory/Entra.

To enable Microsoft Fabric, you need to have one of the following admin roles:

- Microsoft 365 Global admin
- Power Platform admin
- Fabric admin

Deliverables:

- Data Sources: Identify the data sources you want to use in your PoC.
- Data Integration: Use Microsoft Fabric to integrate your data sources and create a unified data model.
- Data Analysis: Use Microsoft Fabric to analyze your data and extract insights.
- Visualization: Create visualizations of your data using Microsoft Fabric.
- Security and Compliance: Ensure that your PoC meets security and compliance standards.
- Performance Optimization: Optimize the performance of your PoC by using Microsoft Fabric.
