

Microsoft Sustainability Manager

## **Record, Report and Reduce Sustainability!**

Knowledge and solutions for a sustainable future

1 day assessment workshop

**Microsoft Cloud for Sustainability provides a comprehensive solution for organizations to drive sustainability efforts and business growth by integrating environmental, social, and governance (ESG) capabilities across Microsoft's cloud portfolio and partner solutions. Sopra Steria is combining its expertise in sustainability consulting with technical consulting around Microsoft Sustainability Manager.**

This user-friendly and extensible solution automates manual processes and unifies data intelligence for a streamlined approach to sustainability management. Digitization and sustainability are two key trends, and Sopra Steria aims to be a leader in Norway and Sweden for sustainability consulting and related supporting systems. Sustainability is beneficial for various industries, and Microsoft Sustainability Manager helps companies quantify their carbon emissions and tackle other sustainability challenges.

This one-day assessment will focus on Microsoft's Cloud for Sustainability solutions, including Microsoft Sustainability Manager, sustainability reporting, and analytics capabilities. Our experts will review your existing sustainability efforts, goals, and limitations and provide insights on alternative approaches, licensing options, and potential costs.

With Microsoft Sustainability Manager, organizations can gain real-time visibility into their emissions, report their impact, and collaborate with others to transform their business end-to-end.

### **What does this workshop include?**

This one-day assessment is designed to review what you are doing to meet your sustainability goals, to see if Microsoft's Cloud for Sustainability Solutions would be a good fit.

Our experts will look and discuss the following items:

- Review your existing approaches to Sustainability.
- Review your current goals and limitations.
- Review the alternatives and approaches using the Microsoft Cloud for Sustainability.
- Review the licensing options and costs.
- Review potential services costs and timeframes.

The assessment will focus on the following first-party solutions:

- Microsoft Sustainability Manager
- Microsoft Cloud for Sustainability data model.
- Sustainability reporting and analytics capabilities.
- Microsoft Power BI
- Microsoft Power Apps
