SO RO ® CO

Discover How Your Teams Work

Strengthening your digital transformation journey through work graph

We find solutions to the following challenges that our clients face at work.

1 | Automation COE

We have **RPA licenses** but struggle with a healthy pipeline for process automation

We want to go **beyond automating small tasks** and deliver STP on complex processes instead

Our manual methods to capture work & processes is **losing a lot of time**

2 | BU Head

Low Automation ROI, **Limited view** of capacity utilization

Help me "**get to the root**" of my productivity benefits before I commit to a Change Program

In what order should I pull **which lever/ when** so that my transformation program is durable and compounding

3 | CXO

Help me understand what teams are doing across my enterprise so I can enhance them with **AI/ML**

I don't have **enough data** to make informed technology investments

Scout, Soroco's Digital Transformation Platform

Scout combines the strength of **Task Mining** and **Process Mining** to power **digital transformation**. It gives organizations a structured view of how work happens on the ground and identifies benefits from applying a portfolio of change levers delivering targeted change programs at scale.

Scout processes all documented and undocumented interactions that happen across 100s of applications and 1000s of documents to accomplish work. Scout assembles these patterns into tasks and end-to-end processes. Scout preserves privacy by anonymizing individuals and focusing only on the team's patterns. An initial pilot of Scout typically provides patterns of work that describe **30-80%** of the time spent by a team.

Scout preserves privacy by anonymizing individuals and focusing only on the team's patterns.

Scout Framework: Scout Powers Change Right from Discovery to Realization

Discovery at Scale

Quickly identify where to begin your digital transformation with Scout's **Task Discovery**

Build a complete picture by mapping your team's effort to end-to-end processes with Scout's **Process Discovery**

Unify Process Excellence & Automation

Improve any aspect of work to identify & engage the best-suited change levers with Scout's **Work Insights**

Achieve straight-through processing and uncover hidden toil within documents with Scout's **Document Insights**

Design & Execute New Operating Models

Centrally drive multiple change programs and reduce the time to realize value with **Studio**

Autogenerate documentation and configuration for your SaaS, RPA BPMN, and IT modernization efforts with **Studio**

Personalized Data Platform

Extend your analytics initiatives or build custom apps using rich data provided by Scout's **SODA**

Gain a data-driven vantage point across your entire business by leveraging the powerful data structures.

Scout Extends Transformation Beyond Automation

Automation is often seen as the only strategic lever that drives digital transformation programs that include:

Standardization   **IT Enhancement**   **Learning Opportunities**   **Templatization**   **Automation**
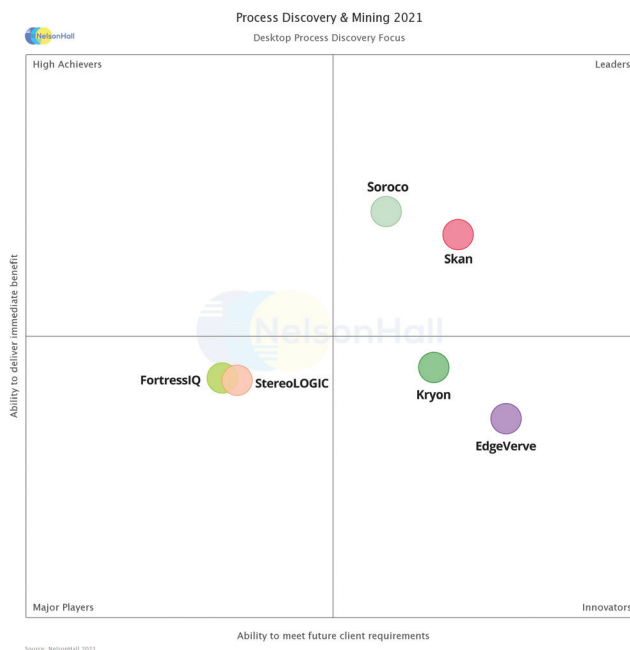

The key to unlocking these levers is to start with Discovery. **Discovery-led realization** creates a holistic and informed transformation program, backed with empirical data. Scout does this by producing detailed insights at scale about tasks, processes, applications, teams, and documents within enterprises, leading to high business impact.

NelsonHall names Soroco a Leader in Process Discovery & Mining NEAT

NelsonHall's evaluation of Process Discovery and Mining Technology NEAT names **Soroco as a leader in Desktop Process Discovery.** As a first of its kind report globally, focused on Process Discovery & Task Mining, six vendors featured in the Desktop Process Discovery market segment, with Soroco named a leader.

HFS Hot Vendor

ISG
Rising Star in ISG Provider Lens for Process Discovery & Mining

What Clients Say About Scout

"In the beginning we used Scout to identify what we don't know from an automation perspective. Today we have the mindset to use it as a technology enabled business process excellence tool."

Radovan Simic
SCM Digital Lead

BAYER

"We started using Soroco's Scout Task Mining within one of our regions and its unsupervised machine learning approach identified around 15 process improvement opportunities in a very short time frame."

William Harris
Group Chief Digital Officer

www.soroco.com

Soroco is on a mission to discover how the world works to help teams be their best. To do this, we are evangelizing and commercializing the work graph, which is a structured view of how teams get work done across people, processes, technology, and documents. The "work graph" unifies disjoint categories like Process Mining, Task Mining, user training, BPM, and RPA to provide a single source of truth. We are a deep tech company with ~40 patents. We have operations across the USA, Europe, UK, Singapore & India with a roster of Fortune 500 customers across 30 countries. Visit www.soroco.com to learn how we help teams discover their work graph
