

# How Mature Is Your DevOps Practice?

Maximise your speed to market with Sourced's DevOps Maturity Assessment

Are you looking to gain a comprehensive insight into your team's DevOps Maturity Practice?

The Sourced DevOps Maturity Assessment is for **Heads of Technology, Development or Operations**, responsible for the organisation's engineering processes, operational compliance, and innovative enablement.

The assessment pays specific attention to **people, processes, and tooling** used, comparing it to the practices implemented in mature DevOps teams and organisations.

## THE BENEFITS

### Enhance Maturity

Achieve DevOps maturity with a clear roadmap and effort estimation aligning to your innovation strategy

### Raise Quality

Raise the quality bar in your organisation by integrating agile practices and continuous improvement

### Increase Velocity

Increase feature release velocity through operational efficiencies and automation

### Improve Security

Embed DevSecOps practices within your release processes to raise awareness of security policies

## Sourced Measures Against the Five Pillars of the CALMS Framework:

CULTURE
