PAPER POLISHER
USER GUIDE

This guide will walk you through the steps of using Paper Polisher, the AI editor every writer needs to have looking over their shoulder, to improve your content.

1. Install the add-in: Depending on your platform, locate the add-in in the appropriate software distribution point. Download the add-in and follow the prompt instructions to install it.

2. Open a file: Once the add-in is installed, open the file containing the content that is to be improved.

3. Enter the content: Type in or paste the content into the opened file.

4. Highlight the text: Select the desired text that needs to be revamped.

5. Press the button in the add-in: Click on the button in the add-in to execute Paper Polisher on the selected content.

6. Your text is replaced with an AI improved version: After clicking the button, the content will be replaced with a version rewritten by Paper Polisher.

7. Help and Support is available via online request: Connect with Support by clicking here.
