App Modernization

2hr Discovery Workshop

Modernized applications are critical to staying competitive, delivering strategic business objectives and delighting customers. But understanding where to invest in modernizing legacy applications for greatest commercial impact is a challenge for IT leaders.

SOUTHWORKS discovery and ideation workshop will help you understand where to invest and how to build and run applications in a cloud-based environment on Azure for your organization.

What we'll cover:

☑ **Assessment:** Rapid understating of starting point and illustration of common challenges

☑ **Strategy Discussion:** Technical stakeholders help you uncover objectives and where the quick strategic wins lie

☑ **Discovery Discussion:** Rapid assessment of where you are now, evaluation of current architecture and user experience, plus recommendations on areas of focus for modernization and migration journey
