

SAP Cloud Services

WE ARE BRINGING INTELLIGENCE, SECURITY AND RELIABILITY OF AZURE TO YOUR SAP APPLICATIONS

With understanding and adopting cloud technology, cloud automation tools and cost optimization strategies, your IT teams will be better positioned to support digital transformation initiatives and meet business demands. Span offers tailor-made SAP cloud services which meet customer requirements in terms of availability, compliance, security and scalability.

Current issues with SAP ECC:

- Complex data model
- High TCO
- Slow innovation
- Hard to perform updates and upgrades
- Performance issues/obsolete equipment
- Limited options for integrations with online services

SAP Standard support for Business Suite ends 2027

Scenarios							
	<p>Development and Test</p> <p>Quick provisioning of development and test environments with the ability to stop environments any time</p>	<p>Production Environments</p> <p>"All in". Deploy entire SAP system landscapes to Azure and deliver cloud-first vision</p>	<p>Disaster Recovery</p> <p>Keep environments for recovery purposes without additional cost</p>	<p>Archiving</p> <p>Archive data and corresponding SAP systems audit-proof without running costs and always available</p>			
Benefits							
	<p>40-75% TCO cost savings</p>	<p>Minutes instead of days faster provisioning</p>	<p>60% less storage costs</p>				
Higher Agility		Lower Costs		Less Complexity		Higher Innovation	

Conversion to SAP S/4HANA brings:

- Simplicity
- Ease of use
- Modernization
- Preparing for future innovation
- Aligning cloud and on-premise application scenarios
- Performance improvement (HANA DB)

Cloudification - Migration to Azure brings:

- Global scale (availability)
- Lower TCO
- Flexibility and scalability, automation
- Speed of deployment
- Guaranteed SLA
- Security improvements
- OPEX vs CAPEX

WHAT DO WE DO?

SAP CLOUD READINESS

SAP CLOUD ENABLEMENT

SAP CLOUD MANAGEMENT

SAP CLOUD STRATEGY

SAP CLOUD ASSESSMENT AND PLAN

SAP S/4HANA DEMO

SAP CLOUD MIGRATION SERVICES

SAP CLOUD BUILD AND INNOVATION SERVICES

SAP MANAGED SERVICES

PROTECT AND RECOVER

CONTINUOUS OPTIMIZATION

- Motivation
- Common challenges
- Prepare organization
- KPI and business benefits

- SAP on Azure assessment
- Migration approach and plan
- Design and architecture
- Right sizing and TCO

- Providing of SAP S/4HANA demo live system on Azure
- Workshop - technical changes and elements of S/4HANA system

- Provisioning of baseline environment
- Pilot SAP migration
- Migration of SAP

- Green/Brown field S/4HANA in cloud implementation
- SAP S/4HANA cloud implementation
- Disaster recovery and business continuity services

- Performance and service availability
- Monitor changes and utilization
- Configuration and patch management

- Backup and recovery
- Security and compliance

- Leverage new features
- Improve performance
- Optimize costs

GOVERNANCE

SAP cloud strategy

Developing SAP cloud strategy helps map your motivations for cloud adoption of your SAP landscape with specific cloud capabilities in order to reach your desired state of transformation.

SAP cloud assessment and plan

A comprehensive assessment of your current SAP landscape includes digital estate inventory, recommendations on how to leverage it and create system architecture that would result with modernized and cost-optimized cloud SAP landscape.

SAP S/4HANA demo

Quick access to the S/4HANA Demo system to get look & feel of this product, accompanied with workshop about technical changes and elements of S/4HANA system.

SAP cloud migration services

Strategies for migration into cloud fall into four broad patterns: rehost, refactor, rearchitect, or rebuild. The strategy you adopt depends on your business drivers and migration goals so the cloud environment after migration is in line with your wanted business outcomes.

SAP cloud build and innovation services

Building cloud-based services and SAP applications as well as innovation in cloud can unlock new technical skills and expand business capabilities. Azure can help accelerate the development of each area of digital invention.

SAP managed services

Basis support, 24x7 monitoring and diagnostics of SAP workloads on Azure gives you visibility across your resources and how well those assets operate. Improving operational compliance with management services reduces the likelihood of an outage related to configuration or vulnerabilities related to systems being improperly managed.

Protect and recover

Protect and recover services enable business continuity, strengthen security and provide advanced threat protection across your cloud workloads.

Continuous optimization

Continuous optimization services deliver guidelines on how to take full advantage of cloud performance, features, scalability, flexibility and cost-saving benefits for your SAP landscape.

CLOUD READINESS HELPS YOU ASSESS YOUR ORGANIZATION'S POTENTIAL FOR THE CLOUD

CLOUD ENABLEMENT WILL BETTER POSITION YOU TO SUPPORT DIGITAL TRANSFORMATION

CLOUD MANAGEMENT ENSURES HIGH-AVAILABILITY, BUSINESS CONTINUITY, SECURITY, CONTINUOUS OPTIMIZATION AND IMPROVEMENT

WHY SPAN?

Span has more than 200 certified experts in Microsoft cloud and SAP technology with broad scope of referent projects. We are present on the market for more than 20 years and have achieved excellence in wide variety of technologies and solutions. Span Cloud Services is one of our strategic businesses where we continuously invest to be able to provide our customers with leading edge cloud solutions, based on diverse services that range from Cloud Readiness and Enablement all the way to Cloud Management services.
