

SMART IAM: Identity & Access Management Assessment

The Spanish Point Identity & Access Management (IAM) Assessment helps organisations evaluate their customer and partner identity access landscape, identify gaps, and build a clear roadmap to implement secure, seamless, and scalable external identity using Microsoft Entra External ID.

Free Assessment

Activities:

- Review authentication flows, user journeys, and security practices for external users
- Identify immediate pain points and gaps
- Explore Microsoft Entra External ID capabilities relevant to your organisation

Outcome:

- Proposed recommendations, roadmap and follow-up work packages
- Experiences from previous customer implementations

Why Spanish Point?

Spanish Point is a trusted Microsoft partner with extensive experience delivering identity and access management solutions. We don't just provide guidance — we design, build, and implement Microsoft Entra solutions tailored to your organisation.

We have successfully delivered multiple IAM implementations for organisations of all types, handling authentication flows, user journeys, MFA, governance policies, and user migration, ensuring solutions are production-ready and fully operational.
