

UNCOVER TRUE PROCESS IMPROVEMENTS WITH sparkhound & MICROSOFT

Organizations often attempt to fix perceived issues before realizing the root cause or seeing the potential business value in process improvement.

With Power Platform's low-code technologies, and newly released Power Automate Process Mining, Sparkhound utilizes a proven methodology to establish current vs desired future state processes in conjunction with business objectives. Process Mining then provides a granular view of actual operations and opportunities for automation, enabling a fine-tuned solution geared towards business value.

THE SPARKHOUND PROCESS METHODOLOGY

TALK TO US IF ANY OF THIS SOUNDS FAMILIAR

You are looking to verify your process

You need guidance aligning new processes and automation with best practices
