

AI-Powered Test Case Generator for Azure DevOps

🚀 FASTER TESTING. BETTER QUALITY. LESS EFFORT.

WHAT IS SPECMONKEY?

Specmonkey is an AI tool for Azure DevOps that automatically creates test cases from your work item descriptions. It helps QA teams save time, avoid mistakes, and improve test coverage – right inside their Azure DevOps workflow.

WHY TEAMS LOVE SPECMONKEY

80% Faster Test Creation

Let AI do the heavy lifting – generate test cases in seconds.

All in One Place

Create, manage, and track test cases inside Azure DevOps.

See Progress Clearly

Get instant test coverage and testing reports.

Smart Test Generation

Works with user stories, features, tasks, and epics.

Built for Security

Enterprise-ready with top security and compliance standards.

WHO BENEFITS THE MOST FROM SPECMONKEY?

-  **QA Teams:** Streamline testing in Azure DevOps.
-  **Teams Without QA:** Save time with AI automation.
-  **Managers:** Gain control and track testing progress.
-  **Developers:** Streamline QA workflows.

HOW IT WORKS

- 1** Write a task in Azure DevOps
- 2** Click “Generate Test Cases”
- 3** Review and apply them to your work item

That's it - your test cases are ready.
