Spektra Systems offers premium consulting & implementation services for Microsoft Windows Virtual Desktop, With Spektra, you can expect quality WVD solution with minimal cost, best in class security & productivity experience.

Spektra Systems is a Microsoft Gold partner providing quality Azure service, In this consulting engagement, Spektra Systems will work with your IT and Business users to setup a desired Windows Virtual Desktop environment. Spektra's WVD expertise will assure that you have a best in class WVD experience from anywhere and on any device, packaged with Microsoft 365 Security capabilities.

Spektra will work with you to define schedule, desired experience, test cases and success criteria before and during the implementation.

Our typical WVD implementation includes

1. Define Project Scope, desired experience and success criteria.
2. Conduct WVD Design Workshop
3. Setup Required Azure Infrastructure and Subscription
4. Setup WVD Host Pools
5. Publish Required Applications & Desktops
6. Setup M365 Security
7. User Acceptance testing and Scenario validations
8. Monitoring & Operations
9. Training for your IT Teams
10. Hand-off or transition to managed services.

This implementation package includes etup WVD for upto 100 Users and upto 20 Applications. Azure Cost will be additional as per actual. Please contact us directly for a custom scope of work if needed.
