Automation Delivers Immediate and Lasting Results

Empower your people to focus on what matters most

Create a more productive business and increased customer satisfaction through happier employees.

Workforce Innovation

RPA software automates repetitive tasks, boosting operational efficiency and liberating employees from mundane activities.

60% of all occupations have at least 30% technically automatable activities.

Higher Productivity

Almost half of work activities globally have the potential to be automated using current technology.

80% of the automation effort which is focused on exception handling, can be improved thanks to better process understanding.

Fast Time to Value

Collecting and processing data are among the activities with the highest automation potential.

The ROI in RPA most often occurred in less than 12 months, with bots delivering an average automation time of around 20% of the original process time

Power Automate – RPA Services Package – Accelerate your Productivity

Rely on our extensive experience implementing Power Automate, and RPA processes to quickly get your organization up and running with RPA.

1

REQUIREMENTS GATHERING (PDD)
