

SpinOne

SaaS Security Platform for Google Workspace, Microsoft 365, Salesforce, and Slack

The rising adoption of mission-critical SaaS applications, such as collaboration tools and CRMs, has resulted in a massive amount of new SaaS data that must be safeguarded for compliance, regulatory, and business continuity purposes.

Defend your SaaS data from the risk of:

Shadow IT

Data Leak

Data Loss

Insider Threat

Ransomware Attacks

Non-Compliance

One Platform for Unmatched Protection

SpinOne is an all-in-one SaaS security platform that protects your SaaS data for Google Workspace, Microsoft 365, Salesforce, and Slack — helping you mitigate risk, prevent data loss, data leak, reduce downtime, save time for Security Operation teams, and improve compliance.

SaaS Security Posture Management

- Quickly identify misconfigurations, security and compliance risks in your SaaS environment
- Reduce risk assessment time from weeks manually to seconds automatically
- Get full visibility and fast incident response for unsanctioned apps and browser extensions that have access to your SaaS data

SaaS Ransomware Detection & Response

- Get 2 hours incident response SLA
- Reduce business downtime from weeks/months to minutes or hours
- Reduce recovery costs by over 90% with automated 3x a day backup

SaaS Data Leak Prevention & Data Loss Protection

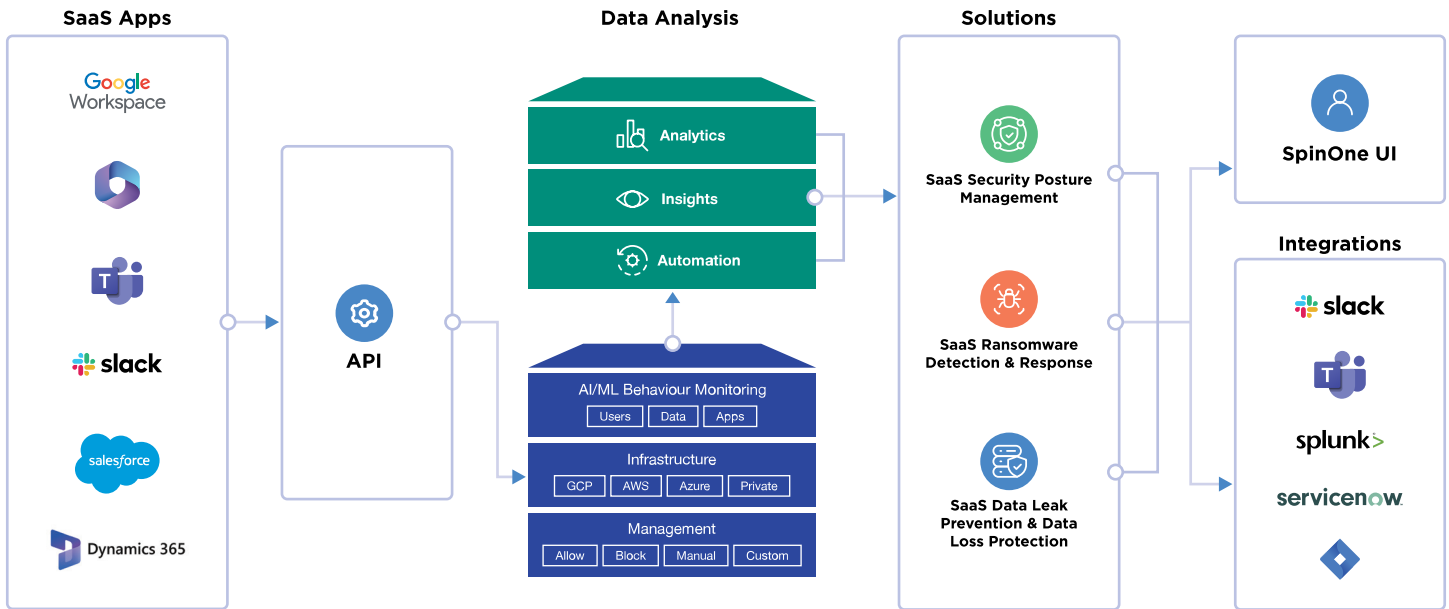

- Improve compliance with automated protection and reduce security issues by 95% in minutes or hours instead of months
- Low false positive and fast data processing
- Identify how employees share your data outside of the company

“SpinOne has been a game changer from day one. We were drawn to Spin.AI’s platform because it was so easy to set up and manage. With SpinOne, we have full transparency into what’s happening in the environment and can enforce policies that are stronger than ever before.”

— **Stephan Matter**, Technical Operations Manager, Tyk Technologies
