

A MOBILE SOLUTION CONNECTING THE FIELD TO THE OFFICE

Spira's Operations Resource Platform (ORP™)

is **changing** the way organizations **gather, distribute and analyze** information from operations by **digitally- linking field and office**, creating a trusted source-record for revenue, cost, compliance, utilization and scheduling

Spira Field Service
Field Operations

Spira's ORP™ consists of distinct but interrelated parts used together or independently decreasing resources required to efficiently & effectively complete work that is distributed in the field for oilfield, construction, logistics and global oil and gas operators sharing timely, accurate, data.

In a world where margins are critical, Spira's products decrease the cost of executing widely distributed field work, decreasing the resources required to complete the work, and drive increased profits.

Spira Connect

Digital Transformation of Supply Chain

- Used by E&P operators & prime contractors to digitally create & send POs & work orders for internal & external work to the right suppliers & departments based on detailed catalogs, MSAs & pricing.
- Digitally receive invoices & field tickets containing financial & operational data for automated validation & approval workflow

Spira On Time

Digital Transformation of Facility Scheduling

- Used by E&P operators & prime contractors to share scheduling & dispatch duties with multiple suppliers & departments for deliveries, personnel, & work for a variety of needs within multiple locations
- Proactively confirms all individuals' certification and competency

Spira LiveJobsite

Digital Transformation of Site Management

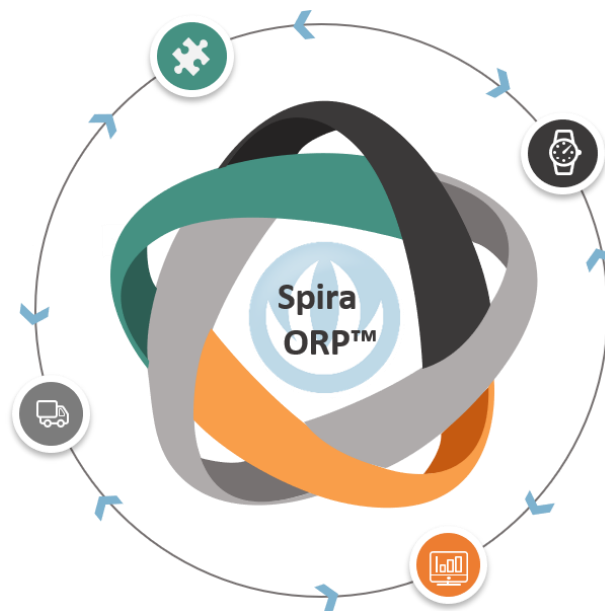

- Used by E&P operators, prime contractors and field service management. Proactively monitors, manages and audits the access of personnel, equipment and materials to facilities, sites, areas and locations - distributing administration and compliance requirements to those who are responsible

Spira Field Services

Digital Transformation of Field Operations

- Used by field service companies to proactively monitor, manage & audit all company activities from bid to invoice by capturing, validating & distributing revenue, cost, & compliance information from the field & office for personnel, equipment, materials to quickly & accurately produce invoices & backup required
