

Copilot for Microsoft 365: Readiness Assessment

Accelerate your AI journey with Spirit's Copilot Readiness Assessment for Microsoft 365.

Before deploying Microsoft Copilot, ensure your environment is secure, compliant, and optimised. Spirit's expert-led Readiness Assessment evaluates your Microsoft 365 environment across licensing, identity, compliance, data, and device readiness to prepare your organisation for successful Copilot adoption.

Key Benefits

- Assess and mitigate security, compliance, and operational risks before deploying Copilot.
 - Align Copilot capabilities to your unique business goals and user needs.
 - Receive a clear roadmap to deploy, optimise, and adopt Copilot securely.
-

Deliverables

- **Readiness Assessment Report:** Includes current posture, identified gaps, and recommended next steps.
 - **Risk & Security Recommendations:** Focused on data governance, compliance, and AI risk mitigation.
 - **Strategy & Design Blueprint:** Tailored Copilot deployment plan aligned with your objectives.
 - **Adoption & Change Guidance:** Includes enablement resources and user engagement strategies.
-

Target Customers

This assessment is ideal for:

- Mid-market and enterprise organisations looking to adopt Microsoft Copilot.
 - Organisations seeking to align AI initiatives with security and compliance standards (ASD Essential 8, ISO 27001, IRAP, GDPR).
 - IT, Security, and Business Leaders needing clarity on readiness, deployment, and risk posture.
-

Why Spirit?

Our mission at Spirit is to deliver secure, high-quality managed technology services that our customers can trust. With deep expertise in cyber security, Microsoft technologies, and business transformation, Spirit helps customers take a secure, business-aligned approach to AI adoption. We ensure your Copilot deployment is not only technically ready—but strategically impactful.
