Who benefits:

- ### Pain points solved:

- 
- datacourage.com

- Costly data entry errors. Automatic data pickup from BC eliminates price, tax or customer-detail mistakes that erode margin and credibility.
- Inconsistent branding & compliance. Company-wide templates and terms ensure every quote looks professional and meets legal and industry requirements.
- Low win rates due to poor follow-up. Built-in, AI-crafted e-mails with clear calls-to-action increase response speed and deal closure rates.

Start converting opportunities faster directly from Business Central - with AI Sales Quote Generator.
