AI GENIE

Empowering today's AI initiatives & fueling tomorrow's innovations

SPYGLASSMTG

The Spyglass AI GENIE is a pre-built accelerator package that we combine with our services to deliver exceptional benefits for your AI initiatives. By working with Spyglass, you can save up to 50% of the time and costs compared to building from scratch, and there are no ongoing licensing costs. This allows you to speed up your time to market, maintain a competitive edge and implement a platform that will grow with your AI needs.

The Benefits

- **Secure and reliable**
- **Custom branding**
- **Choice of LLM**
- **Chat history**
- **No license fees**
- **Pay for what you use**
- **Scalable platform**

Pre-Built Accelerators

- **Secure Infrastructure**
- **Custom Interface**
- **GPT Builder**
- **Development Kit (SDK)**

Spyglass AI GENIE offers the following prebuilt accelerators:

Secure Cloud Infrastructure Built for Success

- Securely designed foundation with a fully developed Azure AI Landing Zone for multiple environments
- Rapid deployment through Infrastructure as Code
- Monitoring dashboard for comprehensive visibility
- Support for applications using PII or PHI
- API Manager configuration to evenly distribute traffic across different regions for faster performance
- Keep track of usage to assign costs based on departments or locations
- Direct application requests to specific models, like PTU-supported ones
- Choose the most suitable Large Language Model, such as Open AI, Llama, or Mistral, for your needs

Customizable Chat User Interface

- Brandable interface: Easy configuration options
- Model Configuration: Ability to direct model output for specific needs
- Choice of Large Language Models: Tailor the AI to your needs
- Save and Retrieve Chat History: Seamlessly track and review conversations

GPT Builder

- Custom self-service tool to help you easily create your own GPTs with a choice of model
- Easy way to upload content for a specific application using drag and drop
- Tailored for a specific user group to create personalized GPTs
- Projects are managed by owners, editors, and users
- Owners and editors can choose the language model, manage files, set prompts, and adjust settings
- Users can select GPTs from a list and chat with stored chat history

Software Development Kit

- Tailored for your organization's size and needs
- User-friendly design to empower your organization to do custom AI development
- Seamless compatibility and comprehensive feature set
- Playbook for ongoing management and support
- Allows for iterative improvements, scalability, and extensibility
