

# Microsoft Cloud-Based VDI Workshop

Accelerate your Virtual Desktop Infrastructure (VDI) move to the cloud

## The Challenge

On-premises Virtual Desktop Infrastructure (VDI) environments could be coming to end of life or needing to be upgraded to provide additional use cases. This can involve large capital investments to continue to upgrade on-premise environments.

## The Solution

The Spyglass MTG offer will help you design and test a cloud-based VDI environment that meets your business and technical requirements. The environment could encompass solutions like Azure Virtual Desktop, Windows 365 and/or Azure Dev Box based on your requirements. Our approach leverages the power and flexibility of Azure and the Microsoft Cloud to provide you with a secure, scalable, and cost-effective VDI solution. By using a cloud native service within Azure to host these applications you are able to:

- Find the best solution based on the VDI use case
- Provide a cost-effective solution
- Utilize Azure and Entra ID's native security controls for a secure host environment
- Implement robust user authentication for heightened security
- Simplify host management within Azure and Intune

## Core Components

- Secure network configurations
- Strong authentication with Entra ID
- User profile management options
- Consistent management with Azure and Intune

## Agenda

- Week 1: Strategy & Planning
- Weeks 2: Testing & Proof of Concept

## Deliverables

- Understand pros and cons of VDI options on Azure and Microsoft Cloud
- Create a working prototype demonstrating the value of cloud-based VDI for your organization

## About Spyglass MTG- A Women Owned/Women Led Company

For over 15 years, we've closely partnered with Microsoft to bring their vast and expanding suite of enterprise solutions to our clients. We leverage proven methodologies, migration tools and expert consultants to architect, build, deploy, migrate to, and manage Microsoft solutions. Whether you are deploying or upgrading M365, implementing Azure, deploying Teams, building a SharePoint Site, developing a Security or Governance Model, designing a Modern Warehouse or BI Solution, or developing AI apps on the Power Platform, we can help!
