

Cloud Based VDI Workshop

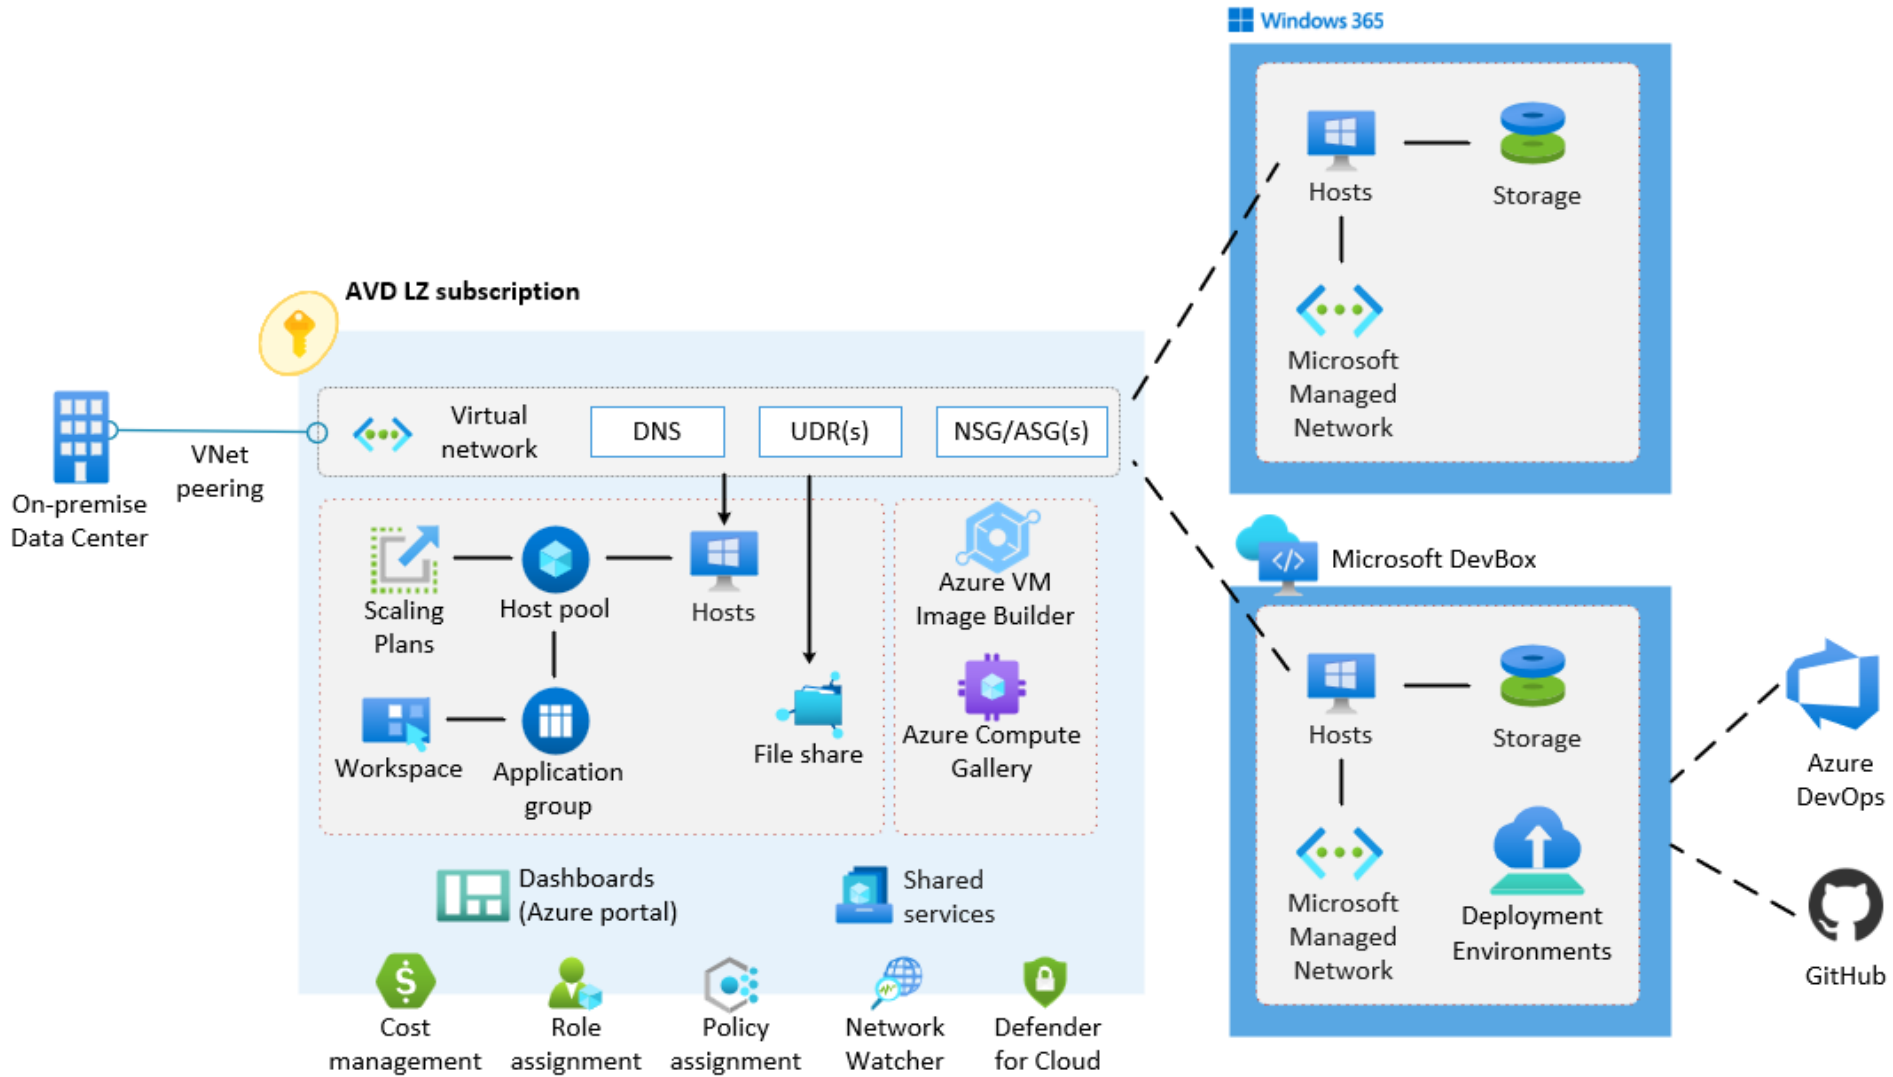

VDI Use Cases

- Azure Virtual Desktop
 - Pooled/multisession hosts
 - Dedicated hosts with roaming profile
 - Remote App usage
 - High performance and/or GPU based compute is needed
- Windows 365
 - Dedicated hosts without roaming profile
 - Predictable/Fixed pricing model
 - Part time/quick on-boarding
- Microsoft Dev Box
 - Developer focused tooling (Visual Studio/git/etc)
 - Deploying infrastructure for developer environments

VDI capabilities

	Azure Virtual Desktop	Windows 365	Microsoft Dev Box
Azure subscriptions	Customer Managed	Microsoft Managed	Shared Management
Compute	Customer Managed	Microsoft Managed	Microsoft Managed
Storage	Customer Managed	Microsoft Managed	Microsoft Managed
Networking	Customer Managed	Microsoft Managed or Private Network Integration	Microsoft Managed or Private Network Integration
User Profiles	FSLogix for storage	Local only	Local only
Identity	Entra join or Hybrid AD join	Entra join or Hybrid AD join	Entra join or Hybrid AD join
Cost Management	Flexible (host sizing/auto scaling)	Fixed per month	Fixed per month
OS Image	Default or Customizable	Default or Customizable	Default or Customizable
Connectivity	Web or Client	Web or Client	Web or Client
Monitoring	Azure Monitor	Endpoint Analytics	Endpoint Analytics

High level VDI Architectures

Thank You
