The Problem

Microsoft 365 Copilot is a whole new way to work thanks to the integration of AI into our normal business tasks that allow us to be more productive and bring forth new insights from the documents we interact with. These new capabilities also bring challenges to adoption, security, and compliance within our environments.

Organizations may find it difficult to maintain consistent controls and policies for interacting with Microsoft 365 Copilot and never realize the potential benefits without introducing significant risk. The issues are around how to:

- Maximizing the business value of Microsoft 365 Copilot
- Handling increased data compliance and security risks
- Setting boundaries and policies for usage
- Steering innovation and integrations with copilot
- Monitoring data access and exfiltration

The Solution

Spyglass's **Microsoft 365 Copilot New Routes (Extensibility)** is focused on achieving extending the capabilities of Microsoft 365 Copilot and making customized user experiences.

- **Extensibility Tools**

- Copilot Studio (Free)
- Copilot Studio (Paid)
- Azure Open AI

- **Extensibility Connections**

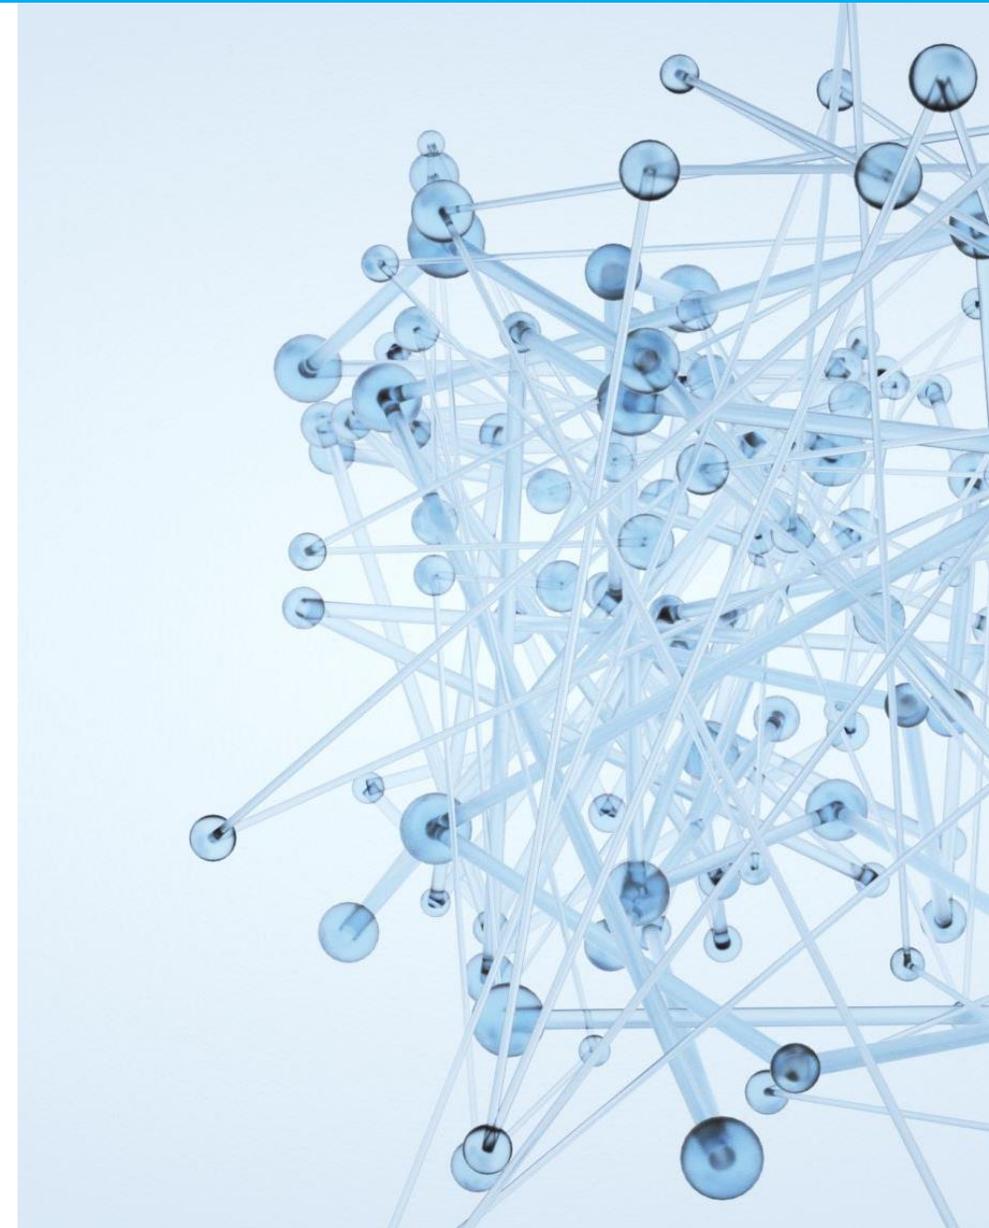

- Plugins
- Connections to Microsoft 365 Apps
- Custom Connectors to LOB and 3rd Party applications

- **Customized Experiences**

- Teams
- **Copilot**
- **Viva**
- **Etc.**

Final Deliverables

- App Connections
- Training

Microsoft 365 CopilotFlight Plan to Secured Deployments

Phase 5: Copilot New Route (Extensibility)

- Define application to be connected
- Development of connected application (up to 1) using either
 - Plugins
 - Copilot Studio Connectors
 - Azure Open AI (Custom Connectors)
- Creation of the connection for 3rd party and LOB apps
- Testing and Validation of the Connected or extended application.
- Deployment of Connected App
- Leveraging Custom Connections (Non-Copilot Studio connections) require scoping.
- Development of better integrated Employee Experiences leveraging:
 - Teams
 - Copilot
 - Viva
 - Etc.
